AUTHOR-SUBJECT INDEX 3

SUBJECT INDEX 29

AUTHOR-SUBJECT INDEX

The number in heavy type refers to the volume, the following number to the page. S. stands for supplement.

Adams, G. O. See Gage, S. DeM.

Addis, T. The bactericidal and hemolytic powers of "paraffin" plasma and of serum, **10**, 200.

Albert, H. Diphtheria: A statistical study of certain laboratory and clinical observations, **4**, 210.

Anderson, J. F. The frequency of tubercle bacilli in the market milk of the city of Washington, D. C., **5**, 107.

The influence of age and temperature on the potency of antidiphtheritic serum and antitoxic globulin solution, **7**, 481.

The relative proportion of bacteria in top milk and bottom milk, and its bearing on infant feeding, **6**, 392.

and Goldberger, J. Natural and induced immunity to typhus fever, **11**, 402.

and McClintic, T. B. A method for the bacteriological standardization of disinfectants, **8**, 1.

See Rosenau, M. J.

Anthony, B. van H. Some characters of the streptococcus found in scarlet fever, **6**, 332.

Arkin, A. The influence of certain oxidizing agents (sodium iodosobenzoate and sodium iodoxybenzoate) on phagocytosis, **11**, 427.

The influence of strychnin, caffein, chloral, antipyrin, cholesterol, and lactic acid on phagocytosis, **13**, 408.

See Rosenow, E. C.

Armstrong, V. See Frost, W. D.

See Fuller, C. A.

Ashburn, P. M., and Craig, C. F. Experimental investigations regarding the etiology of dengue fever, **4**, 440.

Avery, O. T. See North, C. E.

See White, B.

Ayers, S. H., and Johnson, W. T., Jr. Pasteurization in bottles and the process of bottling hot pasteurized milk, **14**, 217.

Baer, J. L. Epidemic gonnorrheal vulvovaginitis in young girls, **1**, 313.

Baeslack, F. W. On the cultivation of the treponema pallidum (Spirochaeta pallida), **12**, 55.

See King, W. E.

Baker, S. K. See Prescott, S. C.

Baldauf, L. K. See Simonds, J. P.

Baldwin, F. A. The pathological anatomy of experimental nagana, **1**, 544.

Banzhaf, E. J., and Famulener, L. W. The influence of chloral hydrate on serum anaphylaxis, **7**, 577.

See Berry, J. L.

See Park, W. H.

See Steinhardt, E.

Barber, M. A. A technic for the inoculation of bacteria and other substances into living cells, **8**, 348.
The effect on mice of minute doses of Bacillus anthracis, **6**, 634.
The effect on the protoplasm of nitella of various chemical substances and microörganisms introduced into the cavity of the living cell, **9**, 117.
The rate of multiplication of Bacillus coli at different temperatures, **5**, 379.

Barron, M. See Larson, W. P.

Bass, F. H. See Bracken, H. M.

Bassoe, P. Disseminated blastomycosis: Report of a case involving the lungs, lumbar vertebrae, and subcutaneous tissues; with multiple abscesses and fistulae, and extensive amyloid degeneration, **3**, 91.
Some observations on acute ascending paralysis, **2**, 589.

Batman, F. H. See Clark, C. P.

Baton, W. U. See Longley, F. F.

Batty, A. J. See LeCount, E. R.

Beach, B. A. See Hastings, E. G.

Beaslack, F. W. See King, W. E.

Becht, F. C., and Greer, J. R. A study of the concentration of the antibodies in the body fluids of normal and immune animals, **7**, 127.

Behrens, C. A. An attenuated culture of Trypanosoma brucei, **15**, 24.

Bel, G. S., and Couret, M. Balantidium coli infection in man, **7**, 609.

Belcher, D. M. See Winslow, C.-E. A.

Bell, E. T. See Larson, W. P.

Bernstein, E. P., and Epstein, A. A. A simple method of sterilizing blood for cultural purposes, **3**, 772.

Berry, J. L. A study of the pneumococcus, with especial reference to the inulin test, **4**, 93.
Tubercle bacilli in the blood, **14**, 162.
and Banzhaf, E. J. Non-variability of diphtheria bacilli, **10**, 409.
and Blackburn, L. P. Comparative toxin production in diphtheria strains, **10**, 404.
and Smeaton, M. A. Comparative tests of sputum by the Kinyoun and Elliman-Erlandsen methods, **14**, 159.

Blackburn, L. P. See Berry, J. L.

Boughton, T. H. Injections of homologous streptococci killed by galactose in the treatment of suppurative complications of contagious diseases, **7**, 99.
Interaction of serum, leukocytes, and bacteria in phagocytosis, **7**, 111.
See Weaver, G. H.

Boxmeyer, C. H. Epizoötic lymphadenitis, a new disease of guinea-pigs, **4**, 657.
See McClintock, C. T.

Bracken, H. M., Bass, F. H., Wesbrook, F. F., Whittaker, H. A., and Hill, H. W. The Mankato typhoid fever epidemic of 1908, **9**, 410.

Breed, R. S. The sanitary significance of body cells in milk, **14**, 93.
and Stidger, I. R. The number of cellular elements in milk, **8**, 361.
See Prescott, S. C.

Broadhurst, J. A biometrical study of milk streptococci, **10**, 272.
The effect of meat and of meat extract media upon the fermentative activity of streptococci, **13**, 404.

Brown, C. P. See Kolmer, J. A.

Browne, W. W. The production of acid by the Bacillus coli group, **15**, 580.

Buchanan, R. E., and Truax, R. Non-inheritance of impressed variations in Streptococcus lacticus, **7**, 680.

Buchner, G. D. See Kastle, J. H.

Buerger, L. Observations on the staining of encapsulated bacteria with particular reference to pneumococci and streptococci, **4**, 426.
and Ryttenberg, C. Observations upon certain properties acquired by the pneumococcus in the human body, **4**, 609.

Bullock, F. D. See Calkens, G. N.

Burmeister, W. H. The meiostagmin and epiphanin reactions in the diagnosis of carcinoma, **12**, 459.
The protein poison of the tonsil, **15**, 549.
See Dick, G. F.

Butterfield, E. E. A case of pulmonary infection with an acid-fast actinomyces, **2**, 421.

Calkins, G. N. A spirochete in mouse cancer, Spirochaeta mycrogyrata (Löwenthal) var. Gaylordi, **4**, 171.
and Clowes, G. H. Some artefacts in mouse carcinoma, **2**, 555.
Bullock, F. D., and Rohdenburg, G. L. The effects of chemicals on the division rate of cells with special reference to possible precancerous conditions, **10**, 421.

Capps, J. A. See Davis, D. J.
and Davis, D. J. The relationship of septic sore throat to infected milk, **15**, 130.

Carlisle, R. J. Two cases of relapsing fever with notes on the occurrence of this disease throughout the world at the present day, **3**, 233.

Carlson, A. J. See Hektoen, L.
See Pettit, R. T.

Caulfield, A. H. On the activation of opsonin in heated serum, **5**, 245.

Chambers, R. See Novy, F. G.

Chapin, C. V. Variation in type of infectious disease as shown by the history of small-pox in the United States, 1895-1912, **13**, 171.

Chapin, C. W. See McCoy, G. W.

Chowning, W. M. See Wilson, L. B.

Clark, C. P., and Batman, F. H. Pneumococcal bronchiolitis (capillary bronchitis), **1**, 229.
and Simonds, J. P. A study of typhoid opsonins, **5**, 1.

Clark, H. W. The resistance to decomposition of certain organic matters in sewage, **S. 2**, 136.
and Gage, S. DeM. On the bactericidal action of copper, **S. 2**, 175.
and Gage, S. DeM. The use of copper sulphate in water filtration, **S. 2**, 172.

Clark, L. T. Some observations on the Wassermann reaction, **7**, 476.
See McClintock, C. T.

Clark, P. F. The relation of the pseudodiphtheria and the diphtheria bacillus, **7**, 335.

Clark, W. M. See Rogers, L. A.

Clarke, F. B., Hamill, R. C., Pollock, L. J., Curtis, A. H., and Dick, G. F. Studies on pellagra based on its occurrence in 1910 in the Cook County institutions at Dunning, Illinois, **10**, 186.

Clegg, M. T., and Wherry, W. B. The etiology of pemphigus contagiosus in the tropics, **3**, 165.
See Musgrave, W. E.

Clowes, G. H. See Calkins, G. N.

Cocoa, A. F. See Dungern, E. von.

Cole, R. I. Experimental streptococcus arthritis in relation to the etiology of acute articular rheumatism, **1**, 714.

Collins, K. R. A study of the dejecta of normal children and of those suffering from acute and subacute diarrhea, with reference to Bacillus dysenteriae, **2**, 620.

The value of the agglutination reaction and of bacteriological methods in the diagnosis of glanders, **5**, 401.

Cooke, J. M. See Hamilton, A.

Copeland, W. R., and Hoover, C. P. The interpretation of tests for Bacillus coli communis, **9**, 343.

See Johnson, G. A.

Corbett, L. S. See Good, E. S.

Corper, H. J. Intra-vitam staining of tuberculous guinea-pigs with fat-soluble dyes. Studies on the biochemistry and chemotherapy of tuberculosis, II, **11**, 373.

Intra-vitam staining of tuberculous guinea-pigs with fat-soluble dyes (supplementary note). Studies on the biochemistry and chemotherapy of tuberculosis, VI, **12**, 274.

The therapeutic value of copper and its distribution in the tuberculous organism. Studies on the biochemistry and chemotherapy of tuberculosis, XI, **15**, 518.

See Wells, H. G.

Couret, M. See Bel, G. S.

Cowie, D. M. See Warthin, A. S.

Crabtree, E. G. Observations on the growth of the gonococcus and the staphylococcus albus from the urethra in plate culture (a criticism of Warden's work), **15**, 309.

Craig, C. F. A study of latent and recurrent malarial infection and the significance of intracorpuscular conjugation in the malarial plasmodia, **4**, 108.

Further observations on the complement fixation test in the diagnosis of lues in the military service: An analysis of 3,950 tests, **9**, 213.

Studies in the morphology of malarial plasmodia after the administration of quinin and in intracorpuscular conjugation, **7**, 285.

Studies upon the amebae in the intestine of man, **5**, 324.

The identity of Entameba histolytica and Entameba tetragena, with observations upon the morphology and life cycle of Entameba histolytica, **13**, 30.

See Ashburn, P. M.

Craster, C. V. The properties and agglutinations of some non-pathogenic vibrios, **12**, 472.

Cumming, J. G. Rabies-hydrophobia. A study of fixed virus, determination of the M.L.D., vaccine treatment (Högyes, Pasteur, and dialyzed vaccine), and immunity tests, **14**, 33.

The quinin treatment of rabies, **15**, 205.

Curtis, A. H. A motile curved anaerobic bacillus in uterine discharges, **12**, 165.

See Clarke, F. B.

Darling, S. T. Equine piroplasmosis in Panama, **13**, 197.

Murrina, a trypanosomal disease of equines in Panama, **8**, 467.

Davis, B. F. The immunological reactions of oidiomycosis (blastomycosis) in the guinea-pig, **8**, 190.

and Petersen, W. F. Complement deviation in Rocky Mountain spotted fever, **8**, 330.

Davis, B. J. See Rogers, L. A.

Davis, D. J. A bacillus from spontaneous abscesses in rabbits and its relation to the influenza bacillus, **12**, 42.
A hemophilic bacillus found in urinary infections, **7**, 599.
Bacteriology and pathology of the tonsils with especial reference to chronic articular, renal, and cardiac lesions, **10**, 148.
Hemophilic bacilli—their morphology and relation to respiratory pigments, **4**, 73.
Immune bodies in urinary infections with colon bacilli and treatment by inoculation, **6**, 224.
Interagglutination experiments with various strains of sporothrix, **12**, 140.
Interrelations in the streptococcus group with special reference to anaphylactic reaction, **12**, 386.
On plasma cells in the tonsils, **10**, 142.
Studies in meningococcus infections, **2**, 602.
Studies in meningococcus infections, **4**, 558.
The actinomyces-like granules in tonsils, **14**, 144.
The bacteriology of whooping-cough, **3**, 1.
The changes in influenzal pneumonia, **10**, 259.
The formation of chlamydospores in Sporothrix schenckii, **15**, 483.
The growth and viability of streptococci of bovine and human origin in milk products, **15**, 378.
The morphology of Sporothrix schenckii in tissues and in artificial media, **12**, 453.
and Capps, J. A. Experimental bovine mastitis produced with hemolytic streptococci of human origin, **15**, 135.
See Capps, J. A.
See Ruediger, G. F.
See Tunnicliff, R.

Day, A. A. See Kendall, A. I.

Day, D. W. The relation between serum resistance and virulence, **2**, 569.

Dewey, K. Tuberculosis of the stomach with extensive tuberculous lymphangitis, **12**, 236.
and Nuzum, F. The effect of cholesterol on phagocytosis, **15**, 472.

DeWitt, L. M. A case of generalized infection with a diphtheroid organism, **10**, 36.
Preliminary report of experiments in the vital staining of tubercles. Studies on the biochemistry and chemotherapy of tuberculosis, IV, **12**, 68.
Report of some experimental work on the use of methylene blue and allied dyes in the treatment of tuberculosis. Studies on the biochemistry and chemotherapy of tuberculosis, VII, **13**, 378.
Report of some experiments on the action of Staphylococcus aureus on the Klebs-Loeffler bacillus, **10**, 24.
Therapeutic use of certain azo-dyes in experimentally produced tuberculosis in guinea-pigs. Studies on the biochemistry and chemotherapy of tuberculosis, VIII, **14**, 498.
and Sherman, H. Tuberculocidal action of certain chemical disinfectants. Studies on the biochemistry and chemotherapy of tuberculosis, IX, **15**, 245.

Dick, G. F. Ferments for carcinomatous protein in the blood in carcinoma, **14**, 242.
Fusiform bacilli associated with various pathological processes, **12**, 191.
Multiple arthritis due to a Friedländer bacillus, **14**, 176.
On institutional dysentery, **8**, 386.
On the development of proteolytic ferments in the blood during pneumonia, **10**, 383.
On the nature of proteolytic substances in the blood, **9**, 282.
On the origin and action of hemolytic complement, **12**, 111.
and Burmeister, W. H. The toxicity of human tonsils, **13**, 273.
and Henry, G. R. Anaerobic cultures in scarlet fever, **15**, 85.

SUBJECT INDEX

The number in heavy type refers to the volume, the following number to the page. S. stands for supplement.

"Abortin" as a diagnostic agent for infectious abortion of cattle, **13,** 351.

Abortion, contagious, in cattle, Bacillus abortus of Bang, the cause of, **7,** 469.
contagious, of cattle, complement fixation reaction in the diagnosis of, **10,** 178.
infectious, bovine, epizootic among guinea-pigs, **11,** 464.
infectious, of cattle, on the value of the "abortin" as a diagnostic agent for, **13,** 351.
infectious, of mares and jennets in Kentucky, etiology of, **13,** 53.

Abscesses, spontaneous, in rabbits, a bacillus from, and its relation to the influenza bacillus, **12,** 42.

Absorption of antitoxin and agglutinin injected subcutaneously, influence of protein content on, **14,** 338.
of bacteria from the peritoneal cavity, on the route of, **4,** 582.
of hemolytic amboceptors, **2,** 485.

Acid-fast bacilli, complement fixation test (Gay's modification of the Besredka method) in differentiation of, **13,** 301.
-fast bacteria, metabolism of, **15,** 417, 423, 428, 433, 439, 443, 451, 455, 460, 467.
fuchsin, decolorized, use of, as an acid indicator in carbohydrate fermentation tests with some remarks on acid production by bacteria, **15,** 227.
lactic, strychnin, caffein, chloral, antipyrin, and cholesterol, influence of, on phagocytosis, **13,** 408.
production by bacteria, **15,** 227.
production of, by the Bacillus coli group, **15,** 580.
-proofness and non-acid-proofness in a saprophytic culture of Bacillus tuberculosis, some chemical conditions influencing, **13,** 144.

Acidity of water, **S. 1,** 70.

Aciduric bacteria, fermentative activities of, **15,** 141.

Actinomyces, acid-fast, a case of pulmonary infection with, **2,** 421.
-like granules in the tonsils, **14,** 144.

Activation of opsonins in heated human serum, **5,** 245.

Acute ascending paralysis, **2,** 589.

Adjuvant action of serum, egg-albumin, and broth on tetanus intoxication, **3,** 116.

Agar, aesculin, the reaction of various bacteria on, **6,** 67.
and gelatin, rapid filtration of, **10,** 129.
broth and gelatin, suggestions for changes in the schedule for making, **S. 2,** 223.
hanging drop, **S. 1,** 97, 312.

Agglutinability of typhoid bacilli in water, **S. 1,** 172.

Agglutination, bacteriolysis, and phagocytosis, the influence of ether and ether anesthesia on, **8**, 147.
in the group of fluorescent bacteria, **1**, 268.
method of diagnosis in the control of glanders, **S. 3**, 85.
of Bacillus coli, **S. 1**, 149.
of bacteria, **S. 2**, 1.
of diplococci, **S. 2**, 10.
of meningococci, **S. 2**, 29.
of streptococci, especially those cultivated from cases of scarlatina by human sera, **1**, 91.
of the dysentery bacillus, **2**, 87.
of typhoid and paratyphoid bacilli by various immune sera, **1**, 445.
reaction, value of, and of bacteriological methods in the diagnosis of glanders, **5**, 401.
test in typhoid fever, use of formalinized cultures in, **1**, 236.
value of, for the diagnosis of hog-cholera, **2**, 351.

Agglutinations and properties of some non-pathogenic vibrios, **12**, 472.

Agglutinin, injected subcutaneously, influence of the protein content on the absorption of antitoxin and of, **14**, 338.

Agglutinoids, so-called, **5**, 361.

Air, comparison between bacteriological analysis of, by the plate method and by filters, **S. 3**, 82.

Alcohol, ether, and chloroform, influence of, on natural immunity in its relation to leukocytosis and phagocytosis, **1**, 425.

Allergic, intracutaneous reaction and the symptoms of anaphylaxis, relation between, **15**, 541.

Allergy, cutaneous, in gonococcal infections, **11**, 77.

Amanita phalloides intoxication, pathology of, **5**, 116.
phalloides, toxins and antitoxins of, **3**, 191.

Amboceptor, hemolytic, absorption of, **2**, 485.

Amebacidal action of emetin, **10**, 162.

Amebae in the intestine of man, **5**, 324.
their cultivation and etiological significance, **2**, 334.

Ammonia, free and albuminoid, in sewage, methods in current use for determining, **1**, 327.
production by certain bacteria, relative constancy of, **13**, 425.

Anaerobes in pure culture, a simple method for isolating, **11**, 207.
bacillus isolated from a case of chronic bronchitis, **13**, 289.

Anaerobic bacillus, motile curved, in uterine discharges, **12**, 165.
cultures in scarlet fever, **15**, 85.
organism associated with acute rhinitis, **13**, 283.
vibrio isolated from a case of acute bronchitis, **15**, 350.

Anaerobiosis, device for, **S. 1**, 307.

Anaphylactic reactions, interrelations in the streptococcus group with special reference to, **12**, 386.
shock in dog, diminished coagulation of blood in, **14**, 476.
"shock" in the dog, physiology of, **7**, 565.

Anaphylatoxic substances, on the production of, by autolysis of bacteria and their relations to endotoxins, **10**, 113.

Anaphylaxis, a review of, with special reference to immunity, **5**, 85.
chemistry of, **5**, 449, **6**, 506, **9**, 147.
cytotoxic immune sera, protective enzymes and, **14**, 351.
egg-white and split products, effects on animals of, **4**, 476.

Anaphylaxis, passive, the immunological relationship of hordein of barley and gliadin of wheat, as shown by the complement fixation, precipitin reactions, and by, **14**, 364.
pneumococcus, and immunity, **9**, 190.
reaction, is the specificity of, dependent on the chemical constitution of the protein or on their biological relations? **12**, 341.
relation between the allergic intracutaneous reaction and the symptoms of, **15**, 541.
relation of calcium to, **12**, 127.
serum, influence of chloral hydrate on, **7**, 577.
specific nature of, **4**, 552.

Anatomy, the pathological, of experimental nagana, **1**, 544.

Anchylostoma caninum, influence of extracts of, on the coagulation of the blood and on hemolysis, **7**, 625.

Anhydrous sodium sulphite, use of, in the preparation of Endo's medium, together with a note on the preparation of anhydrous sodium sulphite and its stability under ordinary conditions, **6**, 619.

Anilin stains in association with "regressive mordanting," histologic differentiation by means of, with special reference to elastic tissues, **15**, 561.

Anopheles, observations on the bionomics of, **2**, 56.

Antagonism exhibited by certain saprophytic bacteria against the bacillus typhosus, **1**, 599.
of bacteria and their products to other bacteria, **2**, 562.

Antemortem and postmortem blood cultures, a comparison of, **2**, 514.

Anthracidal action of dog's blood, rôle of phagocytosis, in, **3**, 102.
substance in the serum of white rats, **3**, 110.

Antibodies and their formation by the blood, on the distribution of, **7**, 319.
are opsonins distinct from other? **3**, 434.
distinct from other antibodies, **6**, 78.
for human corpuscles, production of, in monkeys, **13**, 375.
in body fluids of normal and immune animals, concentration of, **7**, 127.
local production of, **9**, 103.
specific, in scarlet fever, **9**, 366.
the content in, of normal human colostrum and milk, **11**, 347.
the formation of, in rats fed in pure vegetable proteins (Osborne-Mendel stunting food), **15**, 279.
to glucosides, with special reference to Rhus toxicodendron, **4**, 541.

Antibody, an isolated, in the cerebrospinal fluid, **12**, 1.
formation in typhoid, **14**, 56.

Antidiphtheric serum and antitoxic globulin solution, influence of age and temperature on the potency of, **7**, 481.
serum, bleeding to death in order to obtain maximum amount of, from horses, **6**, 616.

Antigen, soluble, fixation by the tissues, **10**, 43.

Antigenic properties of fibrin (exudate), **13**, 69.
properties of glycoproteins, **15**, 501.
properties of the constituents of pneumonic exudate, **13**, 499.

Antigonococcic and antistreptococcic sera, concentration of, **10**, 416.

Antihog-cholera serum, standardization of, **15**, 257.

Anti-infectious power of the blood of infants, **7**, 698.

Antilytic action of salt solution and other substances, **1**, 379.

Antipneumococcal powers of the blood in pneumonia, **10**, 48.
powers of the blood in pneumonia, observations on the opsonic index in, **3**, 731.

Antipyrin, cholesterol, lactic acid, strychnin, caffein, and chloral, influence of, on phagocytosis, **13**, 408.
Antirabic immunity, production of, by intraspinal injections of virus, **11**, 397.
immunization, properties of desiccated rabies virus and its use in, **10**, 369.
Antistreptococcic and antigonococcic sera, concentration of, **10**, 416.
Antistreptococcus, concentrated, serum, and vaccines, in experimental streptococcal arthritis, action of, **15**, 215.
serum, **9**, 130.
serum in streptococcus infections in man, action of, **10**, 321.
Antitetanic serum, treatment of tetanus by, **15**, 367.
Antitoxic and Immunizing Sera, Report of the Committee on, **S. 1**, 284.
globulin solution and antidiphtheric serum, influence of age and temperature on the potency of, **7**, 481.
globulin solution and the whole serum from which it was derived, relative therapeutic value of, **5**, 214.
Antitoxin and agglutinin injected subcutaneously, influence of protein content on the absorption of, **14**, 338.
in man and animals, serum sensitization as related to dosage of, **14**, 347.
Antitoxins, oral administration of, **6**, 46.
oral administration of, for prevention of diphtheria, tetanus, and possibly sepsis, **3**, 701.
Apparatus for counting colonies, **S. 1**, 304.
sputum shaking and sedimentary, **S. 3**, 119.
Artefacts in mouse carcinoma, **2**, 555.
Arthritis, experimental streptococcal, in rabbits, **12**, 364.
experimental streptococcal, the action of vaccines and of concentrated antistreptococcal serum in, **15**, 215.
experimental streptococcus, in relation to the etiology of acute articular rheumatism, **1**, 714.
gonococcus, treatment of, by injection of dead gonococci, and the clinical reaction which follows the injection, **5**, 279.
infectious, of colts, the bacillus abortivus equinus as an etiological factor in, **15**, 347.
multiple, due to a Friedländer bacillus, **14**, 176.
pyemic, in foals, etiology of, **15**, 409.
Articular, renal, and cardiac lesions, chronic, bacteriology and pathology of the tonsils with especial reference to, **10**, 148.
Asiatic cholera, prospective inoculation against, **2**, 107.
Atypical epithelial growth, by injection of scharlach r. in olive oil, **4**, 385.
Autolysis of bacteria, production of anaphylactic substances by, and their relations to endotoxins, **10**, 113.
Auxilysins, **3**, 225.
Avian tuberculosis, **13**, 1.
Azo-dyes in experimentally produced tuberculosis in guinea-pigs, therapeutic use of, **14**, 498.

Bacilli, a new simple method of staining the polar bodies of, **3**, 770.
a simple method of cultivating, preferring conditions of partial anaerobiosis (B. abortus, Bang; B. bifidus, Tissier), **15**, 22.
acid-fast, complement fixation test (Gay's modification of the Besredka method) in differentiation of, **13**, 301.
acid-fast, in nutrient broths, a comparison of the curves of lipolytic activity and proteolysis of, **15**, 467.

Bacilli, colon and typhoid, the toxic effects of certain acids on, in relation to the degree of their dissociation, **3**, 547.
diphtheria, a new simple method for staining polar bodies of, **3**, 770.
diphtheria group of, variability in, **5**, 421.
diphtheria, guinea-pig test of the virulence of, **8**, 295.
diphtheria, in apparently normal throats, **4**, 337.
diphtheria, non-variability of, **10**, 409.
diphtheria, phagocytosis of, **3**, 441.
diphtheria, with special reference to the complement fixation reactions, **11**, 44.
fat-free, tubercle and granulation tissue, influence of iodin and iodids on the absorption of, **15**, 487.
fusiform, and influenza bacilli, spontaneous phagocytosis of, **4**, 66.
fusiform, and spirilla, **8**, 316.
fusiform, and spirilla, identity of, **3**, 148.
fusiform, and spirilla, in connection with morbid processes, **2**, 446.
fusiform, associated with various pathological processes, **12**, 191.
hemophilic, their morphological relation to respiratory pigments, **4**, 73.
lepra, human and rat, in flies, **5**, 507.
of the paratyphoid group, observations on the differentiation of, with studies on Endo's medium, **11**, 109.
paradysentery, the importance of, **S. 1**, 295.
pseudodiphtheria, as the cause of suppurative otitis, especially the post-scarlatinal, **4**, 326.
pseudodiphtheria, so-called, question of virulence among, **1**, 690.
pseudodiphtheria, virulent, **3**, 128.
rat lepra, in the rat louse, **6**, 630.
rat lepra, from the watery emulsions by means of chloroform, on the extraction of, **6**, 630.
relative activity of the soluble lipase and lipase liberated during autolysis of, **15**, 451.
saprophytic human tubercle, metabolism of, in plain, dextrose, mannite, and glycerin broths, **15**, 417.
tubercle, certain rapidly growing, a comparison of the curves of lipolytic activity and proteolysis of, in media of varied composition, **15**, 460.
tubercle, certain rapidly growing human, in broth free from lipoids and fatty substances, the metabolism of, **15**, 423.
tubercle, certain rapidly growing, metabolism of, in a modified Uschinsky medium, **15**, 428.
tubercle, certain rapidly growing, metabolism of, in media with inorganic salts as sources of nitrogen, **15**, 433.
tubercle, dead, the influence of the ingestion of, on infection, **6**, 387.
tubercle, in the blood, **14**, 162.
tubercle, frequency of, in the market milk of the city of Washington, D. C., **5**, 107.
tubercle, the resistance of, to dry heat, **9**, 115.
typhoid and colon, toxic effect of certain acids on, in relation to the degree of their dissociation, **3**, 547.
typhoid-colon intermediate group of, with special reference to complement fixation reactions, **13**, 321.
typhoid, in water, persistance of agglutinability in, **S. 1**, 172.
typhoid-like, in the water-supply of Frederickton, N. B., **S. 1**, 165.
Bacillus anthracis, effect on mice of minute doses of, **6**, 634.
cloacae, an epidemic among English sparrows due to, **6**, 339.
coli, a simple test for the routine detection of, in drinking water, **1**, 341.
coli and Houston's sewage streptococci, some cultural relations and antagonisms of, with a method for the detection and separation of these microorganisms in polluted waters, **1**, 193.

Bacillus coli communis, in water, concerning tests for, **S. 1**, 142.
coli communis, interpretation of tests for, **9**, 343.
coli communis, isolation of, from the alimentary tract of fish, and the significance thereof, **1**, 348.
coli, determination of, **S. 3**, 20, 30, 33, 39.
coli group, classification of, **8**, 241.
coli group, production of acid by, **15**, 580.
coli in water, lactose-bile medium for the detection of, **S. 3**, 33.
coli in water, determination of, **4**, 397.
coli in water, use of lactose-bile and dextrose-broth media for the detection of, **S. 3**, 39.
coli, inhibition, attenuation, and rejuvination of, **7**, 587.
coli, inhibitive action of bile on, **12**, 326.
coli, methods for the rapid detection of gelatin liquefaction in the determination of, **S. 3**, 20.
coli, rate of multiplication of, at different temperatures, **5**, 379.
coli, simple synthetic media for the growth of, and for its isolation from water, **5**, 616.
coli, test for, **S. 1**, 84.
colon, in drinking water, routine detection of, **1**, 341.
diphtheriae, growth and toxin production of, on proteid-free media, **S. 3**, 95.
diphtheriae in non-proteid media, **S. 3**, 95.
diphtheriae in throat cultures, proportion of granulated and barred forms in, **6**, 610.
diphtheriae, opsonic index of, **5**, 14.
dysenteriae, dejecta of normal children and from those suffering from acute and subacute diarrhea with reference to, **2**, 620.
dysentery in diarrheal diseases of children, **2**, 71.
Friedländer, multiple arthritis due to, **14**, 176.
fusiformis, hand infection apparently due to, **8**, 455.
fusiformis, isolated from the blood stream, **13**, 429.
fusiformis, pyemia due to an anaerobic polymorphic bacillus, probably, **10**, 1.
gas, infection by, in coal-mines, **9**, 251.
hemophilic, in urinary infections, **7**, 599.
influenza, a bacillus from spontaneous abscesses in rabbits and its relation to, **11**, 42.
Klebs-Loeffler, action of Staphylococcus aureus on, **10**, 24.
leprosy, experimental immunity with reference to, **9**, 350.
mesentericus and allied organisms, **10**, 210.
mucosus capsulatus, **1**, 241.
mucosus capsulatus group, relation of, to rhinoscleroma, and of the various members of the group to one another, **4**, 51.
mucosus in the blood, purpura associated with, **15**, 151.
muris as the etiological agent of pneumonitis in white rats and its pathogenicity for laboratory animals, **10**, 17.
mycogenes (Bacterium mucogenum), n. sp., an organism belonging to the bacillus capsulatus group, **2**, 431.
paratyphoid-like, isolated from a dog, **8**, 486.
paratyphosis, purpura hemorrhagica with generalized infection with, **4**, 175.
pestis-caviae as a rat virus, use of, **5**, 519.
pestis, immunity of San Francisco rats to infection with, **6**, 289.
pestis, virulence of old and recent cultures of, **6**, 170.
proteus, lesions produced by, **13**, 510.
pseudodiphtheria and the diphtheria bacillus, relation of, **7**, 335.

Bacillus, pseudodiphtheria, immunological observations in ulcerative cystitis caused by, **6**, 296.
tetani, tetanus toxin, and certain laboratory animals, effect of gentian violet on, **15**, 566.
tubercle, behavior of, toward fat-dyes, **12**, 249.
tubercle, in milk, **6**, 325.
tubercle, rapidly growing, in media of varied composition, observations on the specificity and thermostability of the lipase developed during the growth of, **15**, 455.
tuberculosis, action of sunlight on bacteria with special reference to, **S. 3**, 128.
tuberculosis and other bacteria, the lipase of, **11**, 388.
tuberculosis, some chemical conditions influencing acid-proofness and non-acid-proofness in a saprophytic culture of, **13**, 144.
typhoid, esterase activity of plain and dextrose broth cultures of, **15**, 354.
typhoid, in infected water and milk, differential methods for detecting, **6**, 194.
typhoid, joint affections induced by, **6**, 181.
typhoid, on the relation between oxygen in water and the longevity of, **S. 2**, 76.
typhoid, rôle of, in the pulmonary complications of typhoid fever, **2**, 498.
typhosus Gaffky, the antagonism exhibited by certain saprophytic bacteria against, **1**, 599.
typhosus, the longevity of, in natural waters and in sewage, **S. 2**, 40.
Bacteria, a case of non-inheritance of fluctuating variations among, **6**, 90.
acid-fast, **15**, 417, 423, 428, 433, 439, 443, 451, 455, 460, 467.
acid-fast, and tubercle bacilli, occurrence of a soluble lipase in broth cultures of, **15**, 443.
acid production by, **15**, 227.
aciduric, fermentative activities of, **15**, 141.
action of sunlight on, with special reference to Bacillus tuberculosis, **S. 3**, 128.
agglutination of, **S. 2**, 1.
and other substances a technic for the inoculation of, into living cells, **8**, 348.
and their products, the antagonism of, to other bacteria, **2**, 562.
autolysis of, on the production of anaphylatoxic substances by, and their relations to endotoxins, **10**, 113.
biochemical reaction of, **S. 1**, 113.
brilliant green broth as a specific enrichment medium for the paratyphoid-enteriditis group of, **13**, 263.
colon, characteristics of, and the value of the presumptive test, **S. 1**, 147.
colon group of, **14**, 411.
comparative study of species of, **S. 1**, 128.
especially the streptococci, variability of the fermentative reaction of, **15**, 234.
fecal, of healthy men, **6**, 123, 571.
fluorescent, agglutination in the group of, **1**, 268.
from the peritoneal cavity, on the route of absorption of, **4**, 582.
gas-forming, in water, liver broth, a medium for the determination of, **8**, 289.
in bottled milk, distribution of, and certain controlling factors, **7**, 377.
in water and sewage, media for the quantitative estimation of, **1**, 358.
milk, in raw and pasteurized clean milk, relative rate of growth of, **4**, 647.
number of, in sewage and sewage effluents determined by plating on different media and by a new method of direct enumeration, **S. 1**, 209.
numbers and types of, carried by city flies, **10**, 166.
observations on the relative constancy of ammonia production by, **13**, 425.

Bacteria of the colon type found in bovine feces, characteristics of, **15**, 99.
of the colon-typhoid group, indol production by, **14**, 81.
pigment formation of, **S. 1**, 117.
preliminary cultivation of, **S. 1**, 111.
reaction on aesculin agar, **7**, 67.
relative proportion of, in top milk and bottom milk, and its bearing on infant feeding, **6**, 392.
saprophytic, certain, an antagonism exhibited by, against the bacillus typhosus Gaffky, **1**, 599.
stands for museum exhibition of permanent fixed cultures of, **S. 1**, 305.
studies of media for the quantitative estimation of, in water and sewage, **1**, 358.
tests of a method for the direct microscopic enumeration of, **S. 1**, 273.
water, sanitary chemical examination of, **S. 3**, 41.

Bacterial capsules, a new stain for, with special reference to pneumococci, **9**, 1.
colonies in blood-agar plates, the cause of green colorization of, **3**, 663.
content of milk, a comparison of practical methods for determining, **5**, 412.
flora of milk held at low temperature, **7**, 38.
flora of sewage during storage, changes in, **1**, 170.
integrity of celloidin and parchment membranes, **6**, 369.
integrity of colloidion sacs, **7**, 664.
metabolism, studies in. Observations on the relative constancy of ammonia production by certain bacteria, **14**, 425; The esterase activity of plain and broth cultures of the typhoid bacillus, **15**, 354.
pollution of the atmosphere by mouth spray, the extent of, **7**, 17.
precipitins, **1**, 463.
stains, the disinfectant action of, **14**, 255.

Bactericidal action of copper, **S. 2**, 175.
action of quinone and commoner disinfectants, **9**, 181.
action of quinone and other phenol oxidation products, as determined by the Rideal-Walker method, **9**, 172.
and hemolytic powers of "paraffin" plasma and of serum, **10**, 200.
simple, and thermostable, and opsonic substances, **5**, 570.

Bacteriological and cellular study of the lung exudate during life in lobar pneumonia, **8**, 500.
and chemical evidence of hexose sugar in normal milk, **15**, 357.
and sanitary condition of the milk-supply of New York City, **11**, 1.
examination of a plague rat, with notes on the capsular substance formed on nutrient agar by some bacteria, **2**, 577.
examination of milk, comparison of the plating and microscopic methods in, **14**, 512.
examination of milk, methods of, **S. 2**, 214.
standardization of disinfectants, a method for, **8**, 1.

Bacteriology and pathology of milksickness, **4**, 492.
and pathology of plague in squirrels, **6**, 676.
and pathology of the tonsils, with special reference to chronic articular, renal, and cardiac lesions, **10**, 148.
of diphtheria, **11**, 56.
of vaginitis, **15**, 283.
of whooping-cough, **3**, 1.

Bacteriolysis, agglutination, and phagocytosis, influence of ether and ether anesthesia on, **8**, 147.

Bacterium mucogenum and organisms belonging to the bacillus mucosus group, **2**, 431.
pneumoniae in the saliva of healthy individuals, **2**, 431.
tularense, further observations on a plague-like disease of rodents, with a preliminary note on the causative agent, **10**, 61.
tularense, infection of man with, **15**, 331.
welchii, the toxic action and antigenic properties of, **6**, 537.

Balantidum coli infection in man, **7**, 609.

Banti's disease and splenomegaly, **5**, 23.

Bile, blood, feces, and urine, an outfit for sending specimens of, and some results of the examination of such material, **7**, 457.
inhibitive action of, on Bacillus coli, **12**, 326.

Biochemistry and chemotherapy of tuberculosis. Behavior of the tubercle bacilli toward fat-dyes, **12**, 249; Influence of iodin and iodids on the absorption of granulation tissue and fat-free tubercle bacilli, **15**, 487; Intra-vitam staining of tuberculous guinea-pigs with fat-soluble dyes, **11**, 373, **12**, 274; Lipase of Bacillus tuberculosis and other bacteria, **11**, 388; Permeability of tubercles for iodin compounds and proteins, **11**, 349; The use of methylene blue and allied dyes in the treatment of tuberculosis, **13**, 378; Therapeutic use of certain azo-dyes in experimentally produced tuberculosis in guinea-pigs, **14**, 498; Therapeutic value of copper and its distribution in the tuberculous organism, **15**, 518; Tuberculocidal action of certain chemical disinfectants, **15**, 245; Vital staining of tubercles, **12**, 68.

Biological reactions of the vegetable proteins. Anaphylaxis, **8**, 66; Is the specificity of the anaphylaxis reaction dependent on the chemical constitution of the protein or on their biological relations? **12**, 341; Some immunity reactions of edestin, **13**, 103; The anaphylactogenic activity of some vegetable proteins, **14**, 377; The immunological relationship of hordein of barley and gliadin of wheat as shown by the complement fixation, passive anaphylaxis, and precipitin reactions, **14**, 364.

Biology of the cholera spirillum, **2**, 309.

Biometrical method, a study of the diphtheria group of organisms by, **11**, 253.
study of milk streptococci, **10**, 272.

Bionomics of Anopheles, observations on, **2**, 56.

Birds, trypanosomes of, **2**, 256.

Blastomycosis, and coccidiodal granuloma, in the central nervous system, **6**, 523.
botany of organism of, **13**, 85.
disseminated, **3**, 91.
generalized, **3**, 666.
generalized, a comparative study of four strains of organisms isolated from four cases of, **4**, 201.
in the guinea-pig, immunological reactions of, **8**, 190.
systemic, **4**, 187.

Bleeding to death in order to obtain the maximum amount of antidiphtheric serum from horses, **6**, 616.

Blood, bile, feces, and urine, an outfit for sending specimens of, and some results of the examination of such material, **7**, 457.
-cells of vertebrates, some structural transformations of, **15**, 319.
corpuscles (erythrocytes) human, on the resistance of, to cobra venom, **6**, 688.
cultures, taken before and after death, comparison between, **2**, 514.
development of proteolytic ferments in, during pneumonia, **10**, 383.
for cultural purposes, a simple method of sterilizing, **3**, 772.
in anaphylactic shock in the dog, diminished coagulation of the blood in, **14**, 476.
in carcinoma, ferments for carcinomatous protein in, **14**, 242.
in measles, **1**, 551.
in pneumonia and scarlet fever, on variations on the phagocytic and coccidal power of, **8**, 302.
in pneumonia, on the antipneumococcal powers of, **10**, 48.
in scarlet fever, **2**, 375.

Blood, nature of the proteolytic substances in, **9**, 282.
of dairy cows in tick-infested regions, **9**, 324.
of infants, observations on the anti-infectious power of, **7**, 698.
-platelets and certain hematozoa, on the similarity between, **4**, 46.
pneumonic, the rôle of phagocytosis in the pneumococcal action of, **3**, 683.
purpura associated with Bacillus mucosus in, **15**, 151.
stream, isolation of fusiform bacillus from, **13**, 429.
tubercle bacilli in, **14**, 162.

Blue, methylene, and allied dyes in treatment of tuberculosis, **13**, 378.

Botany of the organisms of blastomycosis, **13**, 85.

Brain, normal, the production in vitro in, of structures simulating certain forms of Negri bodies, **11**, 459.

Bronchiolitis, pneumococcal (capillary bronchitis), **1**, 229.

Bronchitis, chronic, an anaerobic bacillus isolated from a case of, **13**, 289.
acute, an anaerobic vibrio isolated from a case of, **15**, 350.

Broth, brilliant green, as a specific enrichment medium for the paratyphoid-enteritidis group of bacteria, **13**, 263.
culture, on the toxicity of, of pneumococcus broth culture filtrates, and on the nature of the proteolytic enzyme obtainable from the pneumococci, **11**, 286.
cultures of the typhoid bacillus, plain and dextrose, the esterase activity of, **15**, 354.
gelatin and agar, suggestions for the changes in the schedules for making, recommended in the last report of the Committee in Standard Methods of Water Analysis, **S. 2**, 223.
liver, a medium for the determination of gas-forming bacteria in water, **8**, 289.
nutrient, a thermostabile, hemolytic precipitate from, **2**, 511.

Caffein, chloral, antipyrin, cholesterol, lactic acid, and strychnin, influence of, on phagocytosis, **13**, 408.

Calcium carbonate and magnesium hydroxid, solubility of, and the precipitation of these salts with lime water, **S. 2**, 151.
relation of, to anaphylaxis, **12**, 127.
salts and the onset of labor, **10**, 378.

Cancer, mouse, a spirochete in, Spirochaeta microgyrata, **4**, 171.
mouse, transplantable, embryonic epithelium, and certain organisms, resistance of, to freezing with liquid air, **5**, 443.

Canine distemper, etiology of, **8**, 399.

Capillary bronchitis, **1**, 229.

Capsular substance formed on nutrient agar by some bacteria, **2**, 577.

Carbohydrate fermentation tests, the use of decolorized acid fuchsin as an acid indicator in, with some remarks on acid production by bacteria, **15**, 227.
media, the differentiation of fecal streptococci by their fermentative reactions in, **13**, 442.
serum broth of constant composition for use in the study of streptococci, a method for making, **15**, 209.

Carbohydrates and related organic media, the classification of streptococci by their action on, **10**, 285.

Carbonic acid in water, **S. 1**, 72.

Carcinoma, ferments for carcinomatous protein in the blood in, **14,** 242.
meiostagmin and epiphanin reactions in the diagnosis of, **12,** 459.
mouse, some artefacts in, **2,** 555.
primary and transplanted, of the breast in mice, a spirochete in, **4,** 155.

Cardiac, chronic articular and renal lesions, bacteriology and pathology of the tonsils, with special reference to, **10,** 148.

Cattle, "abortin" as a diagnostic agent for infectious abortion in, **13,** 351.
contagious abortion of, the complement fixation reaction in the diagnosis of, **10,** 178.

Cell content of milk, **10,** 7.
living, the effect on the protoplasm of nitella of various chemical substances and of micro-organisms introduced into the cavity of, **9,** 117.

Cells, body, in milk, sanitary significance of, **14,** 93.
effects of chemicals on the division rate of, with reference to possible precancerous conditions, **10,** 421.
living, a technic for the inoculation of bacteria and other substances into, **8,** 348.
of the host, of the virus of rabies freed from contaminating organisms and from, **15,** 203.
plasma, in the tonsils, **10,** 143.

Cellular and bacteriological study of the lung exudate during life in lobar pneumonia, **8,** 500.
elements in milk, the number of, **8,** 361.

Cerebrospinal fluid, isolated antibody in, **12,** 1.
meningitis, an institutional outbreak of, restricted by the elimination of carriers, **8,** 444.
meningitis, epidemic, comparative studies of diplococci decolorized by Gram's method, obtained from the spinal fluid and from the nares of cases of, **S. 2,** 10.

Chemistry of anaphylaxis, studies on, **5,** 449, **6,** 506; Experiments with isolated proteins, especially those of the hen's egg, **9,** 147.
physical, to serum pathology, a fundamental error in current attempts to apply, **3,** 638.

Chemotherapy and biochemistry of tuberculosis, studies on. Behavior of the tubercle bacilli toward fat-dyes, **12,** 249; Influence of iodin and iodids on the absorption of granulation tissue and fat-free tubercle bacilli, **15,** 487; Intra-vitam staining of tuberculous guinea-pigs with fat-soluble dyes, **11,** 373, **12,** 274; Lipase of Bacillus tuberculosis and other bacteria, **11,** 388; Permeability of tubercles for iodin compounds and proteins, **11,** 349; The use of methylene blue and allied dyes in the treatment of tuberculosis, **13,** 378; Therapeutic use of certain azo-dyes in experimentally produced tuberculosis in guinea-pigs, **14,** 498; Therapeutic value of copper and its distribution in the tuberculous organism, **15,** 518; Tuberculocidal action of certain chemical disinfectants, **15,** 245; Vital staining of tubercles, **12,** 68.

Chlamydospores in Sporothrix schenckii, **15,** 483.

Chloral, antipyrin, cholesterol, lactic acid, strychnin, and caffein, influence of, on phagocytosis, **13,** 408.
hydrate, influence of, on serum anaphylaxis, **7,** 577.

Chlorine in water, **S. 1,** 66.

Chloroform, ether, and alcohol, influence on, of natural immunity in its relation to leukocytosis and phagocytosis, **1,** 425.

Cholera, **10,** 134.
Asiatic, protective inoculation against, **2,** 107.

Cholera, hog-, **2**, 351; Experimental hyperimmunization, **11**, 441; Some phenomena involved in the life history of Spirochaeta suis, **14**, 246; Spirochaeta suis, its significance as a pathogenic organism, **13**, 463; the virus of, **12**, 39, **106**; 206; Production of in swine, by inoculation with bacteria free filtrates, **2**, 359.
hog-, serum, use of virulent salt solution as a virus in manufacturing, **12**, 335.
red and indol reactions, a search into the nitrate and nitrite content of Witte's "peptone," with special reference to its influence on the demonstration of, **2**, 436.
spirillum, biology of, **2**, 309.
true vibrio, a non-cholera vibrio resembling a pigment-forming vibrio and, **14**, 251.

Cholesterol, effect of, on phagocytosis, **15**, 472.
lactic acid, strychnin, caffein, chloral, antipyrin, and influence of, on phagocytosis, **13**, 408.

Chorion-epithelioma, malignant, the immunological reactions of the proteins of the human placenta, with special reference to the production of a therapeutic serum for, **14**, 385.

Chronic articular, renal, and cardiac lesions, bacteriology and pathology of the tonsils with special reference to, **10**, 148.
bronchitis, an anaerobic bacillus isolated from a case of, **13**, 289.
rhinitis, a pleomorphic branching organism isolated from a case of, **15**, 352.

Classification of streptococci by their action on carbohydrates and related organic media, **10**, 285.
of the colon group, **15**, 187.

Coagulation of the blood, diminished, in anaphylactic shock in the dog, **14**, 476.
of the blood, the influence of extracts of Anchylostoma caninum on, and on hemolysis, **7**, 625.

Coal-mines, infection by the gas bacillus in, **9**, 251.

Cobra venom, resistance of human erythrocytes to, **6**, 688.

Coccacae in the collection of the Museum of Natural History, **12**, 432.
statistical study of generic characters in, **3**, 485.

Coccidioidal granuloma and blastomycosis in central nervous system, **6**, 523.

Collecting case for rabies specimens, **S. 3**, 122.

Collodion membranes as filters, the value of, **7**, 675.
sac, the administration of diphtheria toxin in a, **8**, 50.
sacs, bacterial integrity of, **7**, 664.

Colon and typhoid bacilli, the toxic effect of certain acids on, in relation to the degree of their dissociation, **3**, 547.
bacilli, characteristics of, and the value of the presumptive test, **S. 1**, 147.
bacillus, a simple test for the routine detection of, in drinking water, **1**, 341.
bacillus group, the production of acid by, **15**, 580.
group of bacteria, **14**, 411.
group, temporary alteration of character of an organism belonging to, **S. 2**, 35.
group, the classification of, **15**, 187.
type, characteristic of bacteria of, found in bovine feces, **15**, 99.
typhoid group, indol production by bacteria of, **14**, 81.
typhoid, intermediate group of bacilli, with special reference to complement fixation reactions, **13**, 321.

Colonies, bacterial, in blood-agar plates, cause of green coloration of, **3**, 663.

Color determination of water, **S. 1**, 20.
medium, new, for the isolation and differentiation of streptococci, **7**, 73.

Colostrum in parturient paresis, the toxic character of, **10**, 233.
normal, and milk, the content in antibodies of, **11**, 347.

Colts, the bacillus abortivus equinus as an etiological factor in the infectious arthritis of, **15**, 347.

Comparative study of intestinal streptococci from the horse, the cow, and man, **7**, 1.
toxin production in diphtheria strains, **10**, 404.

Comparison between the results of blood cultures taken during life and after death, **2**, 514.

Complement content of, variation in, of serum and plasma, **11**, 225.
deviation in Rocky Mountain spotted fever, **8**, 330.
fixation in gonococcus infections, **15**, 6.
fixation in gonorrheal infections, **7**, 159.
fixation reaction, application of, to the diphtheria group of organisms, **11**, 433.
fixation reaction in the diagnosis of contagious abortion of cattle, **10**, 178.
fixation reactions, diphtheria bacilli with special reference to, **11**, 44.
fixation reactions, typhoid colon intermediate group of bacilli with special reference to, **13**, 321.
fixation test (Gay's modification of the Besredka method) in the differentiation of acid-fast bacilli, **13**, 301.
fixation test in diagnosis of lues in the military service, **9**, 213.
fixation, the immunological relationship of hordein of barley and gliadin of wheat as shown by passive anaphylaxis, precipitin reactions, and by, **14**, 364.
hemolytic, on the origin and action of, **12**, 111.
in immune serum, the action of certain salts on, **1**, 112.

Concentration of antibodies in body fluids of normal and immune animals, **7**, 127.
of antistreptococcic and antigonococcic sera, **10**, 416.

Concord (N. H.), an outbreak of septic sore throat in, January, 1912, **12**, 491.

Condensed milk, gas in cans of, **S. 1**, 353.

Congenital and placental tuberculosis, a contribution to the casuistry of, **1**, 140.
syphilis, the numerical relationship of Treponema pallidum to certain pathological types of, **6**, 17.

Conjugation in malarial plasmodia, a study of latent and recurrent malarial infection and the significance of intracorpuscular conjugation in, **4**, 108.
intracorpuscular, morphology of malarial plasmodia after the administration of quinin and in, **7**, 285.

Conjunctival reaction for glanders (ophthalmic test), **12**, 170.

Constitution, chemical, is the specificity of the anaphylaxis reaction dependent on the biological relations of the proteins or on? **12**, 341.

Contact filter, mode of action of, in sewage purification, **S. 1**, 229.

Contagious abortion in cattle, Bacillus abortus of Bang, the cause of, **7**, 469.
abortion of cattle, the complement fixation reaction in the diagnosis of, **10**, 178.

Convalescents, diphtheria, the virulence of diphtheria organisms in the throats of well school children and, **4**, 36.

Cook County institutions at Dunning, Illinois, studies on pellagra based on its occurrence in 1910 in, **10**, 186.

Copper, bactericidal action of, **S. 2**, 175.
in water, **S. 2**, 205.
sulphate as germicide, **S. 1**, 327.
therapeutic value of, and its distribution in the tuberculous organism, **15**, 518.

Corpuscles, agglutination of, **4**, 297; **12**, 133.
human, the production in monkeys of antibodies for, **13**, 375.
red, phagocytosis of, **3**, 721.

Cows, dairy, blood of, in tick-infested regions, **9**, 324.
Cultural characteristics of fusiform bacilli, **13**, 438.
reactions of bacteria, **1**, 112.
Culture, attenuated, of Trypanosoma brucei, **15**, 24.
media, a substitute for potato as, **4**, 282.
media, preparation of, **S. 1**, 104.
pure, a simple method for isolating, **11**, 207.
saprophytic, of Bacillus tuberculosis, some chemical conditions influencing acid-proofness and non-acid-proofness in, **13**, 144.
Cultures, anaerobic, in scarlet fever, **15**, 85.
blood, taken during life and after death, a comparison between, **2**, 514.
dried, preparation of, **14**, 100.
formalinized, use of improved technic of agglutination test in typhoid fever, **1**, 236.
from the duodenum of infants, a method of obtaining, **11**, 71.
of trypanosoma, immunization by means of, **11**, 441.
throat, a method of isolating the pneumococcus in mixed cultures, such as, **3**, 183.
Cutaneous allergy in gonococcal infections, **11**, 77.
Cycle, life, and morphology of Entameba histolytica, identity of Entameba histolytica and Entameba tetragena, with observations on, **13**, 30.
Cystitis, ulcerative, causes by the pseudodiphtheria, immunological observations in, **6**, 296.
Cytotoxic immune sera, protective enzymes, and anaphylaxis, **14**, 351.
sera, production of, by the injection of nucleoproteids, **3**, 742.

Dairy cows, blood of, in tick-infected regions, **9**, 324.
Dengue, etiology of. An attempt to produce the disease in the rhesus monkey by the inoculation of defibrinated blood, **15**, 341.
fever, experimental investigations regarding the etiology of, **4**, 440.
Desiccated rabies virus, properties of, and its use in antirabic immunization, **10**, 369; **13**, 155.
Destruction, nitrite, as a presumptive test for the determination of water pollution, **13**, 136.
Diagnosis and etiology of hydrophobia, **3**, 452.
epidemiologic, and management of typhoid fever, **12**, 415.
laboratory, of glanders, **12**, 7.
of carcinoma, meiostagmin and epiphanin reactions in, **12**, 459.
of contagious abortion of cattle, complement fixation reaction in, **10**, 178.
of glanders, value of the agglutination reaction and of bacteriological methods in, **5**, 401.
of syphilis, use of active human serum in, **8**, 427.
Diagnostic agent, "abortin," for the infectious abortion in cattle, **13**, 351.
Diarrhea, acute and subacute, dejecta of normal children and of those suffering from, with reference to Bacillus dysenteriae, **2**, 620.
summer, in infants, **2**, 70.
Differentiation and isolation of streptococci, relative longevity of different streptococci and possible errors in, **15**, 293.
of acid-fast bacilli, complement fixation test (Gay's modification of the Besredka method) in, **13**, 301.
of bacilli of the paratyphoid group, with studies on Endo's medium, **11**, 109.
of fecal streptococci by their fermentative reactions in carbohydrate media, **13**, 442.

Digestion, influence of certain drugs in preventing, and promoting absorption in the alimentary canal, **3**, 701.

Diphtheria, a statistical study of certain laboratory and clinical observations on, **4**, 210.
and pseudodiphtheria bacillus, relation of, **7**, 335.
and tetanus toxins, liver necrosis, and venous thrombosis in horses actively immunized with streptococci and their products and with, **3**, 619.
bacilli, a new simple method for staining the polar bodies of, **3**, 770.
bacilli, a study of, with special reference to complement fixation, **2**, 44.
bacilli, guinea-pig test of the virulence of, **8**, 295.
bacilli in apparently normal throats, presence of, **4**, 337.
bacilli, non-variability of, **10**, 409.
bacilli, phagocytosis of, **3**, 441.
bacteriology of, **2**, 56.
droplet infection in, **12**, 398.
group of bacilli, variability in, **5**, 421.
group of organisms, by the biometrical method, **11**, 253.
group of organisms, the application of complement fixation to, **11**, 433.
organisms in throats of well school children and diphtheria convalescents, the virulence of, **4**, 36.
strains, comparative toxin production in, **10**, 404.
tetanus, and possibly sepsis, oral administration of antitoxins for the prevention of, **3**, 701.
the opsonic index in, **5**, 14.
toxin, a stomach lesion in guinea-pigs caused by, and its bearing on gastric ulcer, **4**, 1.
toxin, natural, observations on natural immunity and susceptibility to, **4**, 509.
toxin, on the administration of, in a collodion sac, **8**, 50.

Diphtheric immunity, passive, duration and disappearance of, **5**, 184.

Diphtheroid organism, a case of generalized infection with, **10**, 36.

Diplococci, decolorized by Gram's method from spinal fluid and from the nares of cases of epidemic cerebrospinal meningitis, **S. 2**, 10.

Disease, infectious, variation in type as shown by history of small-pox in the United States, 1895-1912, **13**, 171.
plague-like, of rodents, with a preliminary note on the causative agent, Bacterium tularense, **10**, 61.

Disinfectant action of certain bacterial stains, **14**, 255.

Disinfectants, a method for the bacteriological standardization of, **8**, 1.
application of certain laws of physical chemistry in the standardization of, **8**, 27.
certain chemical, tuberculocidal action of, **15**, 245.
gaseous, a notable source of error in testing of, **S. 2**, 210.
liquid, a method for determining the germicidal value and penetrating power of, **8**, 250.

Disinfection, discussion of the laws of, with experiments on disinfection of water with ultra-violet light, **10**, 305.
formaldehyd, with special reference to the comparative value of some of the proprietary products, **7**, 641.
of water with ultra-violet light, with a discussion of the laws of disinfection, **10**, 305.

Distemper, canine, etiology of, **8**, 399.

Distribution of antibodies and their formation by the blood, **7**, 319.
of bacteria in bottled milk and certain controlling factors, **7**, 377.

Division rate of cells, effect of chemicals on, with special reference to possible precancerous conditions, **10**, 421.

Dog, diminished coagulation of blood in anaphylactic shock in, **14**, 476.
blood, rôle of phagocytosis in the antracidal action of, **3**, 102.
action on, of the toxic substance obtainable from virulent pneumococci and pneumonic lungs, **11**, 480.

Dogs, effect of quinin on rabies in, **13**, 165.

Drigalski-Conradi medium, modified, **S. 1**, 319.

Drugs and salts, a contribution to the general principles of the pharmacodynamics of, **3**, 572.
influence of, in preventing digestion and promoting absorption from the alimentary canal, the oral administration of antitoxins for prevention of diphtheria, tetanus, and possibly sepsis, with some observations on, **3**, 701.

Dunning, Illinois, pellagra, in 1910, in the Cook County institutions at, **10**, 186.

Duodenum of infants, a method of obtaining cultures from, **11**, 71.

Dyes, allied, and methylene blue in the treatment of tuberculosis, report of some experimental work in the use of, **13**, 378.
fat-soluble, intra-vitam staining of tuberculous guinea-pigs with, **11**, 373; **12**, 274.

Dysentery bacillus group in diarrheal diseases of children, **2**, 71.
institutional, **8**, 386.

Eclampsia and parturient paresis, **10**, 226.

Edestin, some immunity reactions of, **13**, 103.

Edible fungi, on the presence of hemolytic substance in, **4**, 434.

Egg, hen's, anaphylaxis of proteins of, **9**, 147.
-white and its split products, the effects of, on animals, **4**, 476.

Elliman-Erlandsen and Kinyoun methods, comparative tests of sputum by, **14**, 159.

Embalming fluid, test of, **S. 1**, 320.

Embryonic epithelium, transplantable mouse cancer, and certain organisms, the resistance of, to freezing with liquid air, **5**, 443.

Emetin, amebacidal action of, **10**, 162.

Endo's medium, on the use of anhydrous sodium sulphite in the preparation of, together with a note on the preparation of anhydrous sodium sulphite and its stability under ordinary conditions, **6**, 619.
medium, studies on, with observations on differentiation of bacilli of the paratyphoid group, **11**, 109.

Endocarditis, chronic pneumococcus, immunological studies in, **7**, 429.
experimental infectious, **11**, 210.
infectious, a study of pneumococci from cases of, **7**, 411.
staphylococcus and pneumococcus, immunological and experimental studies on, **6**, 245.
vegetative, a case of, caused by an unidentified pleomorphic bacterium, **4**, 617.

Endotoxins, on the production of anaphylatoxic substances by autolysis of bacteria, and their relations to, **10**, 113.

Entameba histolytica and Entameba tetragena, identity of, with observations on morphology and life cycle of Entameba histolytica, **13**, 30.

Enteritidis, paratyphoid-, group of bacteria, brilliant green broth as a specific enrichment medium for, **13**, 263.

Enumeration of bacteria, **S. 1,** 209, 273.
Enzyme, the proteolytic, obtainable from pneumococci, and on the toxicity of broth, of pneumococcus broth culture filtrates, **11,** 286.
Enzymes, protective, cytotoxic immune sera, and anaphylaxis, **14,** 351.
some physical properties of, **2,** 1.
Epidemic among English sparrows, due to Bacillus cloacae, **6,** 339.
gonorrheal vulvovaginitis among young girls, **1,** 313.
Mankato typhoid fever, of 1908, **9,** 410.
milk, of sore throat in Chicago, 1911-12, and streptococci from experimental streptococcal arthritis in rabbits, **12,** 364.
septic sore throat in Concord (N. H.), January, 1912, **12,** 491.
septic sore throat, in Cortland and Homer, N. Y., **14,** 124.
sore throat, streptococci from milk and from, and effect of milk on streptococci, **11,** 338.
spontaneous, typhoid-like, among white rats, **14,** 180.
typhoid, Quincy (Illinois), **13,** 16.
typhoid, Rockford (Illinois), **11,** 21.
Epidemics, two Lincoln (Nebraska) typhoid fever, of 1911 and 1912, **12,** 15.
Epidemiologic diagnosis and management of typhoid fever, **12,** 415.
Epiphanin and meiostagmin reactions in the diagnosis of carcinoma, **12,** 459.
Epithelial cell changes in measles, **6,** 1.
growth, atypical, an attempt to produce, by injection of scarlach r. in olive oil; a control of Fischer's experiments, **4,** 385.
proliferation, experimental, **6,** 205.
Epithelium induced by Sudan III, scarlach roth, and paraffin, proliferations of; and effects of Roentgen irradiation on the same, **6,** 205.
Epizootic lymphadenitis, **4,** 657.
Equine piroplasmosis in Panama, **13,** 197.
Erysipelas, injections of heterologous streptococci killed by galactose in scarlet fever and in, **5,** 608.
opsonic index in, **5,** 268.
recurrent and relapsing, interaction of serum, leukocytes, and bacteria in phagocytosis in a case of, **7,** 111.
Erythrocytes, human, on the resistance of, to cobra venom, **6,** 688.
Esterase activity of plain and dextrose broth cultures of the typhoid bacillus, **15,** 354.
Ether, alcohol, and chloroform, influence of, on natural immunity in its relation to leukocytosis and phagocytosis, **1,** 425.
and ether anesthesia, influence of, on bacteriolysis, agglutination, and phagocytosis, **8,** 147.
Etiology and diagnosis of hydrophobia, **3,** 452.
of acute articular rheumatism, experimental streptococcus arthritis in relation to, **1,** 714.
of acute rheumatism, articular and muscular, **14,** 61.
of canine distemper, **8,** 399.
of dengue. An attempt to produce the disease in the rhesus monkey by the inoculation of defibrinated blood, **15,** 341.
of dengue fever, experimental investigations regarding, **4,** 440.
of infectious abortion of mares and jennets in Kentucky, **13,** 53.
of pemphigus contagiosus in the tropics, **3,** 165.
of pyemic arthritis in foals, **15,** 409.
of relapse in malarial infections, notes on, **12,** 277.
Experimental bovine mastitis produced with hemolytic streptococci of human origin, **15,** 135.
hyperimmunization, **11,** 441.

Experimental infectious endocarditis, **11**, 210.
measles, **2**, 238.
"rheumatic myocarditis," **11**, 243.
streptococcal arthritis, action of vaccines and of concentrated antistreptococcus serum in, **15**, 215.
streptococcal arthritis in rabbits, **12**, 364.
streptococcus arthritis, in relation to the etiology of acute articular rheumatism, **1**, 714.
studies on milk, **11**, 295.
therapy of Rocky Mountain spotted fever, **10**, 294.
Experiments bearing on droplet infection in diphtheria, **12**, 398.
in the vital staining of tubercles, **12**, 68.
interagglutination, with various strains of sporothrix, **12**, 140.
on disinfection of water with ultra-violet light, with a discussion of the laws of disinfection, **10**, 305.
on the action of Staphylococcus aureus on the Klebs-Loeffler bacillus, **10**, 24.
Extract, meat, media, the effect of meat and, on the fermentative activity of streptococci, **13**, 404.
Exudate, fibrin, antigenic properties of, **13**, 69.
lung, during life in lobar pneumonia, a bacteriological and cellular study of, **8**, 500.
pneumonic, antigenic properties of constituents of, **13**, 499.
Fat-dyes, behavior of the tubercle bacillus toward, **12**, 249.
-soluble dyes, intra-vitam staining of tuberculous guinea-pigs with, **11**, 375; **12**, 274.
Fats, determination of, **S. 1**, 77.
Fecal bacteria of healthy men, **6**, 123, 571.
streptococci, differentiation of, by their fermentative reactions in carbohydrate media, **13**, 442.
Feces, bile, blood, and urine, an outfit for sending specimens of, and some results of the examination of such material, **7**, 457.
bovine, characteristics of the bacteria of the colon type found in, **15**, 99.
Fermentation reactions, classification of pathogenic streptococci by, **15**, 63.
Fermentative activities of the aciduric bacteria, an investigation into, **15**, 141.
activity of streptococci, the effect of meat and of meat extract media on, **13**, 404.
reaction of bacteria, especially the streptococci, the variability of, **15**, 234.
reactions in carbohydrate media, the differentiation of fecal streptococci by, **13**, 442.
Ferments for carcinomatous protein in the blood in carcinoma, **14**, 242.
proteolytic, on the development of, in blood during pneumonia, **10**, 383.
Fever, dengue, experimental investigations regarding the etiology of, **4**, 440.
milk (parturient paresis) and eclampsia, **10**, 226.
paratyphoid, pathological anatomy of, **1**, 72.
relapsing, two cases of; with notes on the occurrence of this disease throughout the world at the present day, **3**, 233.
Rocky Mountain spotted, a contribution to the pathological anatomy of, **8**, 421.
Rocky Mountain spotted, complement deviation in, **8**, 330.
Rocky Mountain spotted, experimental therapy of, **10**, 294.
Rocky Mountain spotted, immunity in, **5**, 221.
Rocky Mountain spotted, in the rabbit, **6**, 383.

Fever, Rocky Mountain spotted, observations on the virus and means of transmission of, **4**, 141.
Rocky Mountain spotted, time relationships of the wood-tick in the transmission of, **8**, 339.
scarlet, anaerobic cultures in, **15**, 85.
scarlet, blood in, **2**, 375.
scarlet, intraleukocytic bodies in, **11**, 468.
scarlet, leukocytosis in, **1**, 404, **2**, 375.
scarlet, some characteristics of the streptococci found in, **6**, 332.
scarlet, specific antibodies in, **9**, 366.
"spotted," or "tick fever" of the Rocky Mountains, **1**, 31.
spotted, transmission of, by other than Montana and Idaho ticks, **8**, 322.
spotted, transmission of, by the tick in nature, **8**, 327.
Texas, contribution to the clinical knowledge of, **2**, 529.
"tick," or "spotted fever" of the Rocky Mountains, **1**, 31.
typhoid, an outbreak of, in Cedar Falls, Iowa, **10**, 388.
typhoid, antibody formation in, **14**, 56.
typhoid, epidemic in Rockford (Illinois), **11**, 21.
typhoid, epidemic, the Mankato, of 1908, **10**, 410.
typhoid, epidemic, the Quincy (Illinois), **13**, 16.
typhoid, epidemics, two Lincoln (Nebraska), of 1911 and 1912, **12**, 15
typhoid, epidemiologic diagnosis and management of, **12**, 415.
typhus, natural and induced immunity to, **11**, 402.
typhus, the problem of transmission in, **9**, 9.

Fibrin (exudate), antigenic properties of, **13**, 69.

Filaria loa, **3**, 37.
metamorphosis, of, in the body of the mosquito, **S. 1**, 332.
nocturna, embryo nematode, notes on a case of hematocyluria, together with some observations on the morphology of, **2**, 412.

Filing methods for water data, **S. 1**, 324.

Filter, contact, mode of action of, in sewage purification, **S. 1**, 229.

Filters, value of collodion membranes as, **7**, 675.

Filterable viruses or glycerin-extracts, two methods for obtaining a virus of rabies freed from the cells of the host and from contaminating organisms, and the application of these methods to other, **12**, 202.

Filtrates, pneumococcus broth culture and broth, on the toxicity of, and on the nature of the proteolytic enzyme obtainable from pneumococci, **11**, 286.

Filtration, mechanical, experience with the use of a nonbasic alum in connection with, **S. 2**, 166.
of toxins, **S. 2**, 226.
rapid, of agar and gelatin, **10**, 129.
water, the use of copper sulphate in, **S. 2**, 172.

Fixed virus, determination of the M.L.D., vaccine treatment, and immunity tests, **14**, 33.

Flagellate in the alimentary tract of the sheep-tick, life history of, **6**, 98.

Flies, further notes on rat leprosy and on the fate of human and rat lepra bacilli in, **5**, 507.
numbers and types of bacteria carried by, **10**, 166.
tsetse, trypanosomes of, **3**, 394.

Fluorescent bacteria, agglutination in the group of, **1**, 268.

Foals, etiology of pyemic arthritis in, **15**, 409.

Food preservative, dangerous, sodium sulphite as, **1**, 355.

Formaldehyd disinfection with special reference to the comparative value of some of the proprietary products, **7,** 641.
gas, the liberation of, from solution by means of potassium permanganate, **S. 3,** 114.
liberation of, through the agency of calcium carbide, **S. 3,** 108.

Formalinized cultures, use of, in improved technic of agglutination test in typhoid fever, **1,** 236.

Friedländer bacillus, multiple arthritis due to, **14,** 176.

Fuchsin acid, decolorized, use of, as an acid indicator in carbohydrate fermentation tests with some remarks on acid production by bacteria, **15,** 227.

Fungi, edible, on the presence of hemolytic substances in, **4,** 434.

Fusiform bacilli and influenza bacilli, spontaneous phagocytosis of, **4,** 66.
bacilli and spirilla, **8,** 316.
bacilli and spirilla, identity of, **3,** 148.
bacilli and spirilla in morbid processes, occurrence of, **2,** 446.
bacilli associated with various pathogenic processes, **12,** 191.
bacilli: Cultural characteristics, **13,** 438.
bacillus, hand infection apparently due to, **8,** 455.
bacilli: Isolation and cultivation, **12,** 199.
bacillus, isolation of, from blood stream, **13,** 429.

Gas bacillus in coal mines, infection by, **9,** 251.
illuminating, the relation of, to public health, **9,** 380.
in cans of condensed milk, a possible cause of the formation of, **S. 1,** 352.

Gastric ulcer, experimental, a stomach lesion in guinea-pigs caused by diphtheria toxin and its bearing on, **4,** 1.

Gelatin and agar, rapid filtration of, **10,** 129.
broth, and agar, suggestions for changes in schedules for making, recommended in the last report of the Committee on Standard Methods of Water Analysis, **S. 2,** 223.
liquefaction, in the determination of Bacillus coli, experiments with methods for the rapid detection of, **S. 3,** 20.

Gentian violet, effect of, on the bacillus tetanus, tetanus toxin, and certain laboratory animals, **15,** 566.

Glanders, agglutination method of diagnosis in the control of, **S. 3,** 85.
conjunctival reaction for (ophthalmic test), **12,** 170.
diagnosis of, the value of the agglutination reaction and of bacteriological methods in, **5,** 401.
laboratory diagnosis of, **12,** 7.

Gliadin of wheat and hordein of barley, immunological relationship of, as shown by the complement fixation, passive anaphylaxis, and precipitin reactions, **14,** 364.

Glucosides, antibodies to, with special reference to Rhus toxicodendron, **4,** 541.

Glycoproteins, antigenic properties of, **15,** 501.

Gonococcal infections, cutaneous allergy in, **11,** 77.

Gonococcus and the staphylococcus albus from the urethra in plate culture, observations on the growth of (a criticism of Warden's work), **15,** 309.
arthritis, treatment of, by injections of dead gonococci and the clinical reaction which follows the injections, **5,** 279.
autolysis of, **6,** 217.
infection, general, in a male child without evidence of urethritis, **12,** 52.
infections, complement fixation in, **15,** 6.
studies on, **12,** 93; **13,** 124.

Gonorrhea, rôle of staphylococcus in, **13**, 124.

Gonorrheal infections, a study of complement fixation in, **7**, 159.
vulvovaginitis epidemic in young girls, **1**, 313.
vulvovaginitis in children, **5**, 133.
vulvovaginitis in children, inoculation treatment of, **5**, 158.

Gooch crucible, practical advantages of, in the determination of the total and volatile suspended matter in sewage, **S. 2**, 123.

Granulation tissue and fat-free tubercle bacilli, the influence of iodin and iodids on the absorption of, **15**, 487.

Granules, actinomyces-like, in tonsils, **14**, 144.

Granuloma, coccidioidal, and blastomycosis in the central nervous system, **6**, 523.

Green colorization of bacterial colonies on blood-agar plates, the cause of, **3**, 663.

Hand infection apparently due to Bacillus fusiformis, **8**, 455.
infection, due to an organism resembling the Koch-Weeks bacillus, **1**, 58.

Hardness of water, **S. 1**, 54.

Health, public, historical study of legislation regarding, in the states of New York and Massachusetts, **S. 4**, 1.

Hematochyluria, notes on a case of, together with some observations on the morphology of the embryo nematode-Filaria nocturna, **2**, 412.

Hematozoa and blood platelets, similarity between, **5**, 46.

Hemolysins, alcohol soluble, in blood stream, identification of, **2**, 97.
natural, in rabbit serum, **13**, 96.
serum, in goats, **10**, 332.

Hemolysis, factors in, **5**, 67.
influence of extracts of anchylostoma caninum on the coagulation of the blood and on, **7**, 625.
venom, **7**, 181.

Hemolytic amboceptor, absorption of, **2**, 485.
and bactericidal powers of "paraffin" plasma and of serum, **10**, 200.
complement, on the origin and action of, **12**, 111.
serum, a quantitative study of, **2**, 460.
serum, so-called physical chemistry of, **4**, 219.
streptococci of human origin, experimental bovine mastitis produced with, **15**, 135.
substance in edible fungi, presence of, **4**, 434.

Hemophilic bacilli, their morphology and relation to respiratory pigments, **4**, 73.
bacillus found in urinary infections, **7**, 599.

Hemorrhages in plague, influence of scurvy on, **6**, 564.

Herpetomonads, three new, the transmission of Trypanosoma lewisi by rat fleas, with short descriptions of, **8**, 125.

Hexose sugar in normal milk, bacteriological and chemical evidence of, **15**, 357.

History of small-pox in the United States, 1895-1912, variation in type of infectious disease as shown by, **13**, 171.

Hog-cholera serum, the use of virulent salt solution as a virus in manufacturing, **12**, 335.
some phenomena involved in the life history of Spirochaeta suis, **14**, 246; Spirochaeta suis, its significance as a pathogenic organism, **13**, 463.
studies on, **2**, 351; Experimental hyperimmunization, **11**, 441; Production of, in swine, by inoculation with bacteria-free filtrates, **2**, 359.
virus of, **12**, 39, 106, 206.

Holder for new precision syringe for the accurate injection of small quantities and for other purposes, **13**, 80.

Hordein of barley and gliadin of wheat, immunological relationship of, as shown by complement fixation, passive anaphylaxis, and precipitin reactions, **14**, 364.

Human corpuscles, production in monkeys of antibodies for **13**, 375.
parasites in North America, Filaria loa, **3**, 37.

Hydrophobia, etiology and diagnosis of, **3**, 452.
rabies, a study of fixed virus, determination of the M.L.D., vaccine treatment, and immunity tests, **14**, 33.

Hyperplasias, glandular, of dog's thyroids, on the physiological nature of, with a detailed report of a case typical of the group, **4**, 417.

Illinois (Quincy) typhoid epidemic, **13**, 16.

Illuminating gas and public health, **9**, 380.

Immune bodies in urinary infections with colon bacilli and treatment by inoculation, **6**, 224.
sera, agglutination of typhoid and paratyphoid bacilli by, **1**, 445.
serum, the action of certain salts on the complement in, **1**, 112.

Immunity, antirabic, production of, by intraspinal injections of virus, **11**, 397.
experimental, with reference to the leprosy bacillus, **9**, 350.
in Rocky Mountain spotted fever, **5**, 221.
natural and induced, to typhus fever, **11**, 402.
natural, and susceptibility to diphtheria toxin, **4**, 509.
natural, in its relation to leukocytosis and phagocytosis, influence of alcohol, ether, and chloroform on, **1**, 425.
of San Francisco rats to infection with Bacillus pestis, **6**, 289.
opsonic, on the nature of, **5**, 308.
passive diphtheric, the duration and disappearance of, **5**, 184.
pneumococcus anaphylaxis and, **9**, 190.
review of anaphylaxis with special reference to, **5**, 85.
reactions of edestin, **13**, 103.
tests, fixed virus, determination of the M.L.D., and vaccine treatment, a study of, **14**, 33.
transmission of, from mother to offspring, **10**, 332.

Immunization against hog-cholera, **2**, 368.
antirabic, the properties of desiccated rabies virus and its use in, **10**, 369.
by means of cultures of Trypanosoma lewisi, **11**, 411.
further studies on the effects of the desiccation of the virus of rabies and the use of this material in, **13**, 155.
streptococcus, **5**, 589.

Immunological and experimental studies on pneumococcus and staphylococcus endocarditis, **6**, 245.
observations in ulcerative cystitis caused by pseudodiphtheria bacilli, **6**, 296.
reactions of oidiomycosis in the guinea-pig, **8**, 190.
reactions of the proteins of the human placenta with special reference to the production of a therapeutic serum for malignant chorion-epithelium, **14**, 385.
relationship of hordein of barley and gliadin of wheat as shown by the complement fixation, passive anaphylaxis, and precipitin reactions, **14**, 364.
studies in chronic pneumococcus endocarditis, **7**, 429.

Incubators, 20 C., automatic thermoregulators for, **1**, 419.

Indicator, acid, in carbohydrate fermentation tests, use of decolorized acid fuchsin as, **15**, 227.

Indol, an improved and rapid test for, in broth cultures and for the presence of this substance in meat sugar-free broth, **4**, 641.
and cholera red reactions, a search into the nitrate and nitrite content of Witte's "peptone" with special reference to its influence on the demonstration of, **2**, 436.
production of bacteria of the colon-typhoid group, **14**, 81.
test, an improvement in the technic of, **S. 1**, 325.

Infants, a method of obtaining cultures from the duodenum of, **11**, 71.
anti-infectious power of the blood of, **7**, 698.
summer diarrhea of, **2**, 70.

Infection, Balantidium coli, in man, **7**, 609.
by the gas bacillus in coal-mines, **9**, 251.
droplet, in diphtheria, **12**, 398.
fatal, by a hitherto undescribed chromogenic bacterium, Bacillus aureus foetidus, **2**, 49.
general gonococcus, in a male child without evidence of urethritis, **12**, 52.
generalized, with a diphtheroid organism, a case of, **10**, 36.
hand, apparently due to Bacillus fusiformis, **8**, 455.
malarial, latent and recurrent, and the significance of intracorpuscular conjugation in the malarial plasmodia, **4**, 108.
of man with Bacterium tularense, **15**, 331.
plague, in a brush-rat, **7**, 368.
plague, susceptibility of certain domestic animals to, with particular reference to that of ground squirrel origin, **9**, 276.
plague, susceptibility of gophers, field mice, and ground squirrels to, **6**, 283.
pulmonary, a case of, with an acid-fast actinomyces, **2**, 421.
secondary, in pulmonary tuberculosis. The recovery of the streptococcus and pneumococcus from the blood, **9**, 237.

Infections, gonococcal, cutaneous allergy in, **11**, 77.
gonorrheal, complement fixation in, **7**, 159.
malarial, etiology of relapse in, **12**, 277.
meningococcus, **2**, 602, **4**, 558.
of accessory sinuses, a spirochete associated with, **13**, 280.
pneumococcus and pneumonia, **1**, 280.
pyocyaneus, with a report of two rare cases, **5**, 542.
streptococcus, **3**, 156.
streptococcus, in man and the action of antistreptococcus serum, **10**, 321.
streptococcus, opsonins in pneumonia and in, **4**, 601.
urinary, a hemophilic bacillus in, **7**, 599.

Infectious abortion, bovine, epizootic among guinea-pigs, **11**, 464.
abortion in cattle, "abortin" as a diagnostic agent for, **13**, 351.
abortion of mares and jennets in Kentucky, etiology of, **13**, 53.
arthritis of colts, the bacillus abortivus equinus as an etiological factor in, **15**, 347.
disease, variation in type of, as shown by the history of small-pox in the United States, 1895-1912, **13**, 171.
endocarditis, experimental, **11**, 210.

Influenza and fusiform bacilli, spontaneous phagocytosis of, **4**, 66.
bacilli, **4**, 73, **7**, 599.
bacillus, a bacillus from spontaneous abscesses in rabbits and its relation to, **12**, 42.

Influenzal pneumonia, changes in, **10**, 259.

Inhibitive action of bile upon Bacillus coli, **12**, 326.

Injection, accurate, of small quantities, a new precision syringe for: A holder for such syringes and for other purposes, **13**, 80.

Injections of hemologus streptococci killed by galactose in the treatment of suppurative complications of contagious diseases, **7**, 99.
of virus, intraspinal, in production of antirabic immunity, **11**, 397.

Inoculation of bacteria and other substances into living cells, a technic for, **8**, 548.
protective, against Asiatic cholera, **2**, 107.
treatment, in gonorrheal vulvovaginitis in children, **5**, 158.

Institutional dysentery, **8**, 386.

Interaction of serum, leukocytes, and bacteria in phagocytosis, as observed in a case of recurrent and relapsing erysipelas, **7**, 111.

Interagglutination experiments with various strains of sporothrix, **12**, 140.

Intermediate, typhoid colon, group of bacilli, with special reference to complement fixation reactions, **13**, 321.

Internal secretion of the mammae as a factor in the onset of labor, **10**, 244.

Interrelations in the streptococcus group with special reference to anaphylactic reactions, **12**, 386.

Intestinal obstruction, toxins of, **15**, 124.
streptococci from the horse, the cow, and man, **7**, 1.

Intraleukocytic bodies in scarlet fever, **11**, 468.

Intraspinal injections of virus, the production of antirabic immunity by, **11**, 397.

Intra-vitam staining of tuberculous guinea-pigs with fat-soluble dyes, **11**, 373, **12**, 274.

Inulin test, a study of the pneumococcus with special reference to, **4**, 93.

Investigation into the fermentative activities of the aciduric bacteria, **15**, 141.

Iodids and iodin, influence of, on the absorption of granulation tissue and fat-free tubercle bacilli, **15**, 487.

Iodin compounds and proteins, permeability of tubercles for, **11**, 349.

Iron in water, **S. 1**, 44.

Isoagglutination in man and lower animals, **12**, 133.
of human corpuscles, **4**, 297.

Isolating anaerobes in pure culture, a simple method for, **11**, 207.

Isolation and cultivation of fusiform bacilli, **12**, 199.
and differentiation of streptococci, the relative longevity of, different streptococci and possible errors in, **15**, 293.
of an anaerobic bacillus from a case of chronic bronchitis, **13**, 289.
of fusiform bacillus from blood stream, **13**, 429.

Jennets and mares in Kentucky, etiology of infectious abortion of, **13**, 53.

Kinyoun and Elliman-Erlandsen methods, comparative tests of sputum by, **14**, 159.

Kjeldahl nitrogen and nitrogen as free ammonia, application to a soft-water sewage of direct processes for the determination of, **S. 3**, 14.
process, a method for the direct determination of organic nitrogen by, **S. 2**, 109.
process, determination of the organic nitrogen in the sewage by, **S. 1**, 255.

Klebs-Loeffler bacillus, some experiments on the action of staphylococcus aureus on, **10**, 24.

Koch-Weeks bacillus, peculiar form of hand infection due to an organism resembling, **1**, 58.

Kyes, Preston, some remarks on the publication of, entitled "Venom Hemolysis," **10**, 57.

Labor, calcium salts and the onset of, **10**, 378.
the internal secretion of the mammae as a factor in the onset of, **10**, 244.

Laboratory diagnosis of glanders, **12**, 67.
methods and devices, **S. 1**, 304.

Lactic acid, strychnin, caffein, chloral, antipyrin, and cholesterol, influence of, on phagocytosis, **13**, 408.

Lactose-bile medium, **S. 3**, 30, 33, 39.

Latent pneumococcemia, **3**, 446.

Laws of disinfection, a discussion of, with experiments on disinfection of water with ultra-violet light, **10**, 305.

Legislation, historical study of, regarding public health in the states of New York and Massachusetts, **S. 4**, 1.

Lepra bacilli, human and rat in flies, rat leprosy and the fate of, **5**, 507.
bacilli, rat, from watery emulsion by means of chloroform, on the extraction of, **6**, 630.
bacilli, rat, in the rat louse, **6**, 630.
bacillus, grass bacillus, and smegma bacillus, the metabolism of, in plain, dextrose, mannite, and glycerin broths, **15**, 439.

Leprosy bacillus, experimental immunity with reference to, **9**, 350.
human, organisms resembling, with a consideration of their etiological significance, **11**, 116.
rat, the fate of human and rat lepra bacilli in flies, **5**, 507.
rat, vaccination against, **6**, 630.
tubercle of, presence of suppuration in, **8**, 39.

Leukemia of the common fowl, **4**, 369.

Leukocytes and streptococci in milk, the significance of, **S. 3**, 50.
and streptococci in the production of a high-grade milk, the significance of, **5**, 72.
bactericidal substance in, **6**, 319.
phagocytic activity of, in measles, **11**, 474.
variations in phagocytic power of, in infants, **7**, 698.
variations in phagocytic power of, in pneumonia and scarlet fever, **8**, 302.

Leukocytosis and leukopenia following injections of heated bacterial cultures, **6**, 38.
and phagocytosis, influence of alcohol, ether, and chloroform on natural immunity in its relation to, **1**, 425.
in scarlet fever, **1**, 404.

Leukocytotoxins of normal serum, **5**, 173.

Leukopenia and leukocytosis following injections of heated bacterial cultures, the relation of the opsonic index to, **6**, 38.

Life cycle and morphology of Entameba histolytica, the identity of Entameba histolytica and Entameba tetragena, **13**, 30.
history of a flagellate in the alimentary tract of the sheep-tick, **6**, 98.

Lincoln (Nebraska), two typhoid fever epidemics of 1911 and 1912, **12**, 15.

Lipase developed during the growth of rapidly growing tubercle bacilli in media of varied composition, observations on the specificity and thermostability of, **15**, 455.

of Bacillus tuberculosis and other bacteria, **11**, 388.

soluble, and lipase liberated during autolysis of certain rapidly growing tubercle bacilli, the relative activity of, **15**, 451.

soluble, the occurrence of, in broth cultures of tubercle bacilli and other acid-fast bacteria, **15**, 443.

Liver broth; a medium for the determination of gas-forming bacteria in water, **8**, 289.

necrosis and venous thrombosis in horses actively immunized with diphtheria and tetanus toxins and with streptococci and their products, **3**, 619.

Lobar pneumonia. See pneumonia.

Local production of antibodies, **9**, 103.

Longevity of Bacillus typhosus in natural waters and in sewage, **S. 2**, 40.

of the typhoid bacillus in water, **1**, 641.

relative, of different streptococci, and possible errors in the isolation and differentiation of streptococci, **15**, 293.

Lues in the military service, complement test in the diagnosis of, **9**, 213.

see syphilis.

Lung exudate during life in lobar pneumonia, a bacteriological and cellular study of, **8**, 500.

Lungs, pneumonic, and virulent pneumococci, action on dogs of the toxic substance obtainable from, **11**, 480.

Lymph nodes, frequency, localization, and modes of dissemination of tuberculosis, with special reference to its occurrence in, and during childhood, **2**, 143.

Lymphadenitis, epizootic, **4**, 657.

Lymphangitis, extensive tuberculous, tuberculosis of the stomach with, **12**, 236.

Lyperosia irritans, an attempt to transmit poliomyelitis by the bite of, **15**, 1.

Magnesium hydroxid and calcium carbonate, the solubility of, and the precipitation of these salts with lime water, **S. 2**, 151.

Malaria, latent and recurrent infections, and the significance of intracorpuscular conjugation in the malarial plasmodia, **4**, 108.

see anopheles, **2**, 56.

Malarial infections, etiology of relapse in, **12**, 277.

plasmodia, morphology of, after the administration of quinin and in intracorpuscular conjugation, **7**, 285.

plasmodia, significance of intracorpuscular conjugation in, and a study of latent and recurrent malarial infection, **4**, 108.

Mammae, internal secretion of, as a factor in the onset of labor, **10**, 244.

Management and epidemiologic diagnosis of typhoid fever, **12**, 415.

Mankato typhoid fever epidemic of 1908, **9**, 410.

Mares and jennets in Kentucky, etiology of infectious abortion of, **13**, 53.

Massachusetts, an outbreak of tonsillitis or septic sore throat and its relation to an infected milk-supply, **10**, 73.

and New York, historical study of legislation regarding public health in the states of, **S. 4**, 1.

Mastitis, experimental bovine, produced with hemolytic streptococci of human origin, **15**, 135.

Measles, blood in, **1**, 551.
epithelial cell changes in, **6**, 1.
experimental, **2**, 238.
observation on the phagocytic activity of leukocytes in, **11**, 474.
Mechanism of opsonic action, **6**, 66.
Media, artificial, morphology of Sporothrix schenckii in tissues and in, **12**, 453.
carbohydrate, differentiation of fecal streptococci by their fermentative reactions in, **13**, 442.
for quantitative estimation of bacteria in water and sewage, **1**, 358.
meat, and meat extract, the effect of, on the fermentative activity of streptococci, **13**, 404.
preparation of, **S. 1**, 82, 104.
simple synthetic, for the growth of Bacillus coli and for its isolation from the water, **5**, 616.
Medium, a new color, for the isolation and differentiation of streptococci, **6**, 73.
culture, a substitute for potato as, **4**, 282.
Endo's, differentiation of bacilli of the paratyphoid group in, **11**, 109.
for diphtheria diagnosis, **S. 1**, 317.
modified Uschinsky, the metabolism of certain rapidly growing tubercle bacilli in, **15**, 428.
specific enrichment, brilliant green broth as, for the paratyphoid-enteritis group of bacteria, **13**, 263.
Meiostagmin and epiphanin reactions in the diagnosis of carcinoma, **12**, 459.
Meningitis, cerebrospinal, an institutional outbreak of, restricted by the elimination of carriers, **8**, 444.
cerebrospinal, epidemic, comparative studies of diplococci decolorized by Gram's method, obtained from the spinal fluid and from the nares of cases of, **S. 2**, 10.
Meningococci, the frequent occurrence of, in the nasal cavities of meningitis patients and of those in direct contact with them, **S. 2**, 21.
Meningococcus infections, **2**, 602, **4**, 558.
Metabolism, bacterial, studies in. Observations on the relative constancy of ammonia production by certain bacteria, **13**, 425; The esterase activity of plain and dextrose broth cultures of the typhoid bacillus, **15**, 354.
of certain radidly growing tubercle bacilli in a modified Uschinsky medium, **15**, 428.
of certain rapidly growing tubercle bacilli in broth free from lipoids and fatty substances, **15**, 423.
of certain rapidly growing tubercle bacilli in media with inorganic salts as sources of nitrogen, **15**, 433.
of "lepra bacillus," grass bacillus, and smegma bacillus in plain, dextrose, mannite, and glycerin broths, **15**, 439.
of saprophytic human tubercle bacilli in plain, dextrose, mannite, and glycerin broths, **15**, 417.
Method for determination of Bacillus coli in water, **4**, 397.
for testing indol in broth cultures and for the presence of this substance in meat sugar-free broth, **4**, 641.
for the simultaneous passage of many paraffin sections through the more difficult stains, **4**, 382.
new, for determining the relative stability of a sewage, effluent, or polluted river water, **14**, 482.
new, for staining Negri bodies, **5**, 566.
of isolating the pneumococci in mixed cultures, such as throat cultures, **3**, 183.

Method of obtaining cultures from the duodenum of infants, **11**, 71.
of staining the polar bodies of diphtheria bacilli, **3**, 770.
of sterilizing blood for cultural purposes, **3**, 772.
Methods, differential, for detecting the typhoid bacilli in infected water and milk, **6**, 194.
in current use for determination of free and albuminoid ammonia in sewage, **1**, 327.
of testing shellfish for pollution, **7**, 78.
Kinyoun and Elliman-Erlandsen, comparative tests of sputum by, **14**, 159.
plating and microscopic, comparison of, in the bacteriological examination of milk, **14**, 512.
simple and differential, of staining encapsulated pneumococci in smear and section, **3**, 610.
two, for obtaining a virus of rabies, freed from the cells of the host and from contaminating organisms, and the application of these methods to other filterable viruses and glycerin-extracts, **12**, 202.
Methylene azure and methylene violet, **3**, 412.
blue and allied dyes in the treatment of tuberculosis, **13**, 378.
blue, reduction of, by nervous tissue, **1**, 590.
blue, use of, in testing sewage effluents, **S. 3**, 1.
violet and methylene azure, **3**, 412.
Microorganisms and various chemical substances introduced into the cavity of the living cell, the effect on the protoplasm of nitella of, **9**, 117.
Microscopic preparations, staining of, **S. 1**, 313.
Milk, a comparison of the practical methods for determining the bacterial content of, **5**, 412.
and milk products, the growth and viability of streptococci of bovine and human origin in, **15**, 378.
and normal human colostrum, the content in antibodies of, **11**, 347.
and the human throat, a statistical study of the streptococci from, **12**, 144.
and water, infected, differential methods for detecting the typhoid bacillus in, **6**, 194.
body cells in, the determination of the number of, by a direct method, **7**, 632.
bottled, the distribution of bacteria in, and certain controlling factors, **7**, 377.
cell content of, **10**, 7.
comparison of the plating and the microscopic methods in the bacteriological examination of, **14**, 512.
condensed, a possible cause of the formation of gas in, **S. 1**, 353.
cultures of tubercle bacillus isolated from, **6**, 329.
effect of, on streptococci, and a study of streptococci from milk and from epidemic sore throat, **11**, 338.
experimental studies on, **11**, 295.
experiments on the germicidal action of, **5**, 534.
fever (parturient paresis) and eclampsia, **10**, 226.
from apparently healthy cows, leukocyte standards and leukocyte content of, **S. 3**, 63.
held at low temperature, bacterial flora of, **7**, 38.
high-grade, the significance of leukocytes and streptococci in the production of, **5**, 72.
hot, pasteurized, pasteurization in bottles and the process of bottling, **14**, 217.
infected, the relation of septic sore throat to, **15**, 130.
market, of the city of Washington, D. C., the frequency of tubercle bacilli in, **5**, 107.
methods of bacteriological examination of, **S. 2**, 214.
normal, the bacteriological and chemical evidence of the occurrence of a hexose sugar in, **15**, 357.

Milk, number of cellular elements in, **8**, 361.
relative importance of streptococci and leukocytes in, **S. 3**, 50.
raw and pasteurized clean, the relative rate of growth of milk bacteria in, **4**, 647.
sanitary, production of, **7**, 47.
sanitary significance of body cells in, **14**, 93.
significance of streptococci in, **3**, 173.
streptococci, a biometrical study of, **10**, 272.
streptococci from, and from epidemic sore throat, and the effect of milk on streptococci, **11**, 338.
-supply, city's, comparative value of bacterial and temperature regulations for, **S. 3**, 76.
-supply, infected, and an outbreak of tonsillitis or septic sore throat in eastern Massachusetts, **10**, 73.
-supply of New York City, bacteriological and sanitary condition of, **11**, 1.
top and bottom, the relative proportion in, and its bearing on infant feeding, **6**, 392.
tubercle bacillus in, **6**, 325.

Milksickness, **6**, 401, 492.

Mills-Reincke phenomenon and Hazen's theorem concerning the decrease of mortality from diseases other than typhoid fever following the purification of public water-supplies, **7**, 489.

Mines, coal, infection by the gas bacillus in, **9**, 251.

Monkey, rhesus, an attempt to produce dengue in, by the inoculation of defibrinated blood, **15**, 341.

Monkeys, production in, of antibodies for human corpuscles, **13**, 375.

Morphological characters of bacteria, **S. 1**, 96.

Morphology and life cycle of Entameba histolytica, the identity of Entameba histolytica and Entameba tetragena with observations on, **13**, 30.
malarial plasmodia after the administration of quinin, and in intracorpuscular conjugation, **7**, 285.
of Sporothrix schenckii in tissues and in artificial media, **12**, 453.

Mortality, decrease of, from diseases other than typhoid fever following water purification, **7**, 489.

Mosquito cage, new, **S. 3**, 123.
metamorphosis of filaria in the body of, **S. 1**, 332.

Mosquitoes and other insects, trypanosomes of, **4**, 223.
common, of the Bihé and Bailundo districts, Portugese West Africa, **2**, 627, **3**, 187.
see anopheles, **2**, 56.

Motile curved anaerobic bacillus in uterine discharges, **12**, 165.

Mouse cancer, transplantable, embryonic epithelium, and certain organisms, the resistance of, to freezing with liquid air, **5**, 443.
carcinoma, some artefacts in, **2**, 555.

Mouth disinfection in the prophylaxis and treatment of pneumonia, **3**, 774.
spray, an investigation of the extent of bacterial pollution of the atmosphere by, **7**, 17.

Mucosus capsulatus group, a biometrical study of, **15**, 268.
capsulatus group, an organism belonging to Bacillus mycogenes, n. sp., **2**, 431.

Multiplication of bacillus coli at different temperatures, rate of, **5**, 379.

Murrina, a trypanosomal disease of equines in Panama, **8**, 467.

Mus musculus, a new species of trypanosome occurring in the mouse, **3**, 228.

Mushrooms, poisonous, the toxins and antitoxins of, **3**, 191.

Myocarditis, experimental rheumatic, **11**, 243.

Nagana, experimental, pathological anatomy of, **1**, 544.
Natural and induced immunity to typhus fever, **11**, 402.
immunity in its relation to leukocytosis and phagocytosis, influence of alcohol, ether, and chloroform on, **1**, 425.
Necrosis, liver, and venous thrombosis in horses actively immunized with diphtheria and tetanus toxins and with streptococci and their products, **3**, 619.
Negri bodies, a method for the staining of, **5**, 566.
production in the normal brain of structures simulating certain forms of, **11**, 459.
Nematode, embryo, Filaria nocturna, a case of hematochyluria with some observations on the morphology of, **2**, 412.
Nervous tissue, reduction of methylene blue by, **1**, 590.
New York and Massachusetts, historical study of legislation regarding public health in the states of, **S. 4**, 1.
city, bacteriological and sanitary condition of the milk supply of, **11**, 1.
Nitella, effect on the protoplasm of various chemical substances and of microorganisms introduced into the cavity of the living cell, **9**, 117.
Nitrate and nitrite content of Witte's "peptone," with special reference to its influence on the demonstration of the indol and cholera red reactions, **2**, 436.
Nitrates, relation of, to putrescibility of sewages, **13**, 236.
Nitrite destruction as a presumptive test for the determination of water pollution, **13**, 136.
Nitrogen, Kjeldahl, and a free ammonia, the application to a soft-water sewage of direct processes for the determination of, **S. 3**, 14.
metabolism of certain rapidly growing tubercle bacilli in media with inorganic salts as sources of, **15**, 433.
organic, a method for the direct determination of, by the Kjeldahl process, **S. 2**, 109.
organic, in sewage, a method for the direct determination of, by the Kjeldahl process, **S. 1**, 255.
Noma, **4**, 8.
Non-acid-proofness and acid-proofness, some chemical conditions influencing, in a saprophytic culture of Bacillus tuberculosis, **13**, 144.
-basic alum in connection with mechanical filtration, experience with the use of, **S. 2**, 166.
-inheritance in impressed variations in Streptococcus lacticus, **7**, 680.
-inheritance of fluctuating variations among bacteria, a case of, **6**, 90.
-pathogenic vibrios, the properties and agglutinations of, **12**, 472.
-variability of diphtheria bacilli, **10**, 409.
Nucleoproteids, production of cytotoxic sera by the injection of, **3**, 742.
Numbers and types of bacteria carried by city flies, **10**, 166.

Odor of water, **S. 1**, 23.
Oidiomycosis, **3**, 666.
Opsonic action, mechanism of, **6**, 66.
immunity, nature of, **5**, 308.
index and the antipneumococcal power of the blood in pneumonia, **3**, 731.
index and vaccine therapy of pseudodiphtheria otitis, **4**, 313.
index in acute articular rheumatism, **6**, 346.
index in diphtheria, **5**, 14.
index in erysipelas, **5**, 268.

Opsonic index in normal rabbits, **4**, 595.
index, relation of, to the leukopenia and leukocytosis, following injections of heated bacterial cultures, **6**, 38.
index, streptococci, in scarlatina, **4**, 304.
substances in normal serum, the interaction of thermolabile and thermostable, **5**, 263.
thermostable and simple bactericidal substances, on the occurrence of, **5**, 570.

Opsonin, activation of, in heated human serum, **5**, 245.
determinations in the discovery of typhoid carriers, the value of, **7**, 393.
pneumococcal, human, and the antiopsonic substance in virulent pneumococci, **4**, 285.

Opsonins and phagocytosis in lower animals, **4**, 333.
are they distinct from other antibodies? **3**, 434.
distinct from other antibodies, **6**, 78.
in pneumonia and in streptococcus infections, **4**, 601.
normal, effect of reaction and salts on, **6**, 662.
specificity of, in normal serum, **5**, 249.
typhoid, **5**, 1.

Oral administration of antitoxins, **6**, 46.
administration of antitoxins for the prevention of diphtheria, tetanus and possibly sepsis, with some observations on the influence of certain drugs in preventing digestion and promoting absorption from the alimentary canal, **3**, 107.

Organ extracts, fresh and autolyzed, the influence of, on experimental tuberculosis, **8**, 176.

Organism, an anaerobic, associated with acute rhinitis, **13**, 283.
of blastomycosis, botany of, **13**, 85.
of rabies and experiments in its artificial cultivation, **13**, 232.
pathogenic, significance of Spirochaeta suis as, **13**, 463.
pleomorphic branching, isolated from a case of chronic rhinitis, **15**, 352.

Organisms, contaminating, virus of rabies freed from the cells of the host and from, **13**, 203.
cultivated from the lesions of human leprosy, with a consideration of their etiological significance, **11**, 116.

Osborne-Mendel stunting food, the formation of antibodies in rats fed on, **15**, 279.

Otitis, pseudodiphtheria, opsonic index and vaccine therapy of, **4**, 313.
suppurative, pseudodiphtheria bacilli as the cause of, especially the postscarlatinal, **4**, 326.

Oxidizing agents (sodium iodosobenzoate and sodium iodoxybenzoate) influence of, on phagocytosis, **11**, 427.

Oxygen consumed, determination of, **S. 1**, 26.

Panama, equine piroplasmosis in, **13**, 197.

Paradysentery bacilli, importance of, **S. 1**, 295.

"Paraffin" plasma and serum, bactericidal and hemolytic powers of, **10**, 200.

Paralysis, acute ascending, **2**, 589.

Paramecia, toxic action of scarlatinal and pneumonic sera on, **1**, 211.

Parasites, human, in North America. Filaria loa, **3**, 37.

Paratyphoid and typhoid bacilli, agglutination of, by various immune sera, **1**, 445.

Paratyphoid-enteritis group of bacteria, brilliant green broth as a specific enrichment medium for, **13**, 263.
fever, the pathological anatomy of, **1**, 72.
group, studies on Endo's medium, with observations on the differentiation of bacilli of, **11**, 109.
-like bacillus isolated from a dog, **8**, 486.
Paresis, parturient, and eclampsia, **10**, 226.
parturient, the toxic character of the colostrum in, **10**, 233.
Pasteurization in bottles and the process of bottling hot pasteurized milk, **14**, 217.
Pathogenicity of Streptococcus lacticus, **4**, 87.
Pathological anatomy of experimental nagana, **1**, 544.
anatomy of paratyphoid fever, **1**, 72.
anatomy of Rocky Mountain spotted fever, **8**, 421.
processes, fusiform bacilli associated with, **12**, 191.
Pathology and bacteriology of milksickness, **6**, 492.
and bacteriology of plague in squirrels, **6**, 676.
and bacteriology of the tonsils with special reference to chronic articular, renal, and cardiac lesions, **10**, 148.
of Amanita phalloides intoxication, **5**, 116.
serum, a fundamental error in current attempts to apply physical chemistry to, **3**, 638.
Pellagra, in 1910 in the Cook County institutions at Dunning, Illinois, **10**, 186.
Pemphigus contagiosus in the tropics, the etiology of, **3**, 165.
Peptone, Witte's, nitrate and nitrite content of, with special reference to its influence on the demonstration of the indol and cholera red reactions, **2**, 436.
Phagoctability of pneumococci in the sputum in pneumonia, **5**, 471.
Phagocytic activity of leukocytes in measles, **11**, 474.
Phagocytosis and leukocytosis, influence of alcohol, ether, and chloroform on natural immunity in its relation to, **1**, 425.
and opsonins in the lower animals, **4**, 333.
bacteriolysis, and agglutination, the influence of ether and ether anesthesia on, **8**, 147.
effect of cholesterol on, **15**, 472.
influence of certain oxidizing agents (sodium iodosobenzoate and sodium iodoxybenzoate) on, **11**, 427.
influence of strychnin, caffein, chloral, antipyrin, lactic acid, and cholesterol on, **13**, 408.
interaction of serum, leukocytes, and bacteria in, as observed in a case of recurrent and relapsing erysipelas, **7**, 111.
of diphtheria bacilli, **3**, 441.
of red corpuscles, **3**, 721.
rôle of, in the antracidal action of dog blood, **3**, 102.
rôle of, in the pneumococcal action of pneumonic blood, **3**, 683.
spontaneous, of fusiform bacilli and influenza bacilli, **4**, 66.
studies in, **2**, 128.
Pharmacodynamics of salts and drugs, general principles of, **3**, 572.
Physical chemistry, so-called, of hemolytic serum, **4**, 219.
chemistry to serum pathology, a fundamental error in current attempts to apply, **3**, 638.
Physiology of anaphylactic "shock" in the dog, **7**, 565.
Piroplasmosis, equine, in Panama, **13**, 197.

Placenta, human, the proteins of, with special reference to the production of the therapeutic serum for malignant chorion-epithelioma, **14**, 385.
tuberculosis of, **4**, 347.

Plague among ground squirrels of California, **5**, 485.
in squirrels, pathology and bacteriology of, **6**, 676.
in the prairie dog, the desert wood rat, and the rock squirrel, the susceptibility to, **7**, 374.
infection in a brush-rat, **7**, 368.
infection, susceptibility of gophers, field mice, and ground squirrels to, **6**, 283.
infection, with particular reference to that of ground squirrel origin, susceptibility of certain domestic animals to, **9**, 276.
influence of scurvy on hemorrhages in, **6**, 564.
-like disease of rodents, with note on the causative agent, Bacterium tularense, **10**, 61.
subacute, in man due to ground squirrel infection, **6**, 670.
susceptibility to, of the weasel, the chipmunk, and the pocket gopher, **8**, 42.

Plasma and sera, variation in the complement content of, **11**, 225.
cells in the tonsils, **10**, 142.

Platinum-cobalt method for color, **S. 1**, 21.

Pleomorphic branching organism isolated from a case of chronic rhinitis, **15**, 352.

Pneumococcal bronchiolitis (capillary bronchitis), **1**, 229.
opsonin, human, and the antiopsonic substance in virulent pneumococci, **4**, 285.

Pneumococcemia, latent, **3**, 446.

Pneumococci, a new stain for bacterial capsules with special reference to, **9**, 1.
and streptococci, the staining of encapsulated bacteria with special reference to, **4**, 426.
from cases of infectious endocarditis, **7**, 411.
nature of the toxic substance from, **11**, 235.
phagocytability of, in the sputum in pneumonia, **5**, 273.
simple and differential methods of staining in smear and section, **3**, 610.
staining of encapsulated bacteria with particular reference to streptococci and, **4**, 426.
toxic substances obtainable from, **11**, 94.
toxicity of broth, of pneumococcus broth culture filtrates, and on the proteolytic enzyme obtainable from, **11**, 286.
virulent, and pneumonic lungs, the action on dogs of the substance obtainable from, **11**, 480.
virulent, antiopsonic substance in, and human pneumococcal opsonin, **4**, 285.

Pneumococcus anaphylaxis and immunity, **9**, 190.
and streptococcus, the recovery of, from the blood. Secondary infection in pulmonary tuberculosis, **9**, 237.
broth culture filtrates, on the toxicity of broth and of, and on the nature of the proteolytic substance obtainable from pneumococci, **11**, 285.
comparative virulence of, in sputum of lobar pneumonia at various stages of the disease, with special reference to crisis, **9**, 287.
endocarditis, chronic, immunological studies in, **7**, 429.
in mixed cultures, such as throat cultures, a method of isolating, **3**, 183.
in the human body, certain properties acquired by, **4**, 609.
infections and pneumonia, **1**, 280.
inulin test of, **4**, 93.
-streptococcus group, transmutations within, **14**, 1.

Pneumonia and pneumococcus infections, **1,** 280.
and scarlet fever, on the variations in the phagocytic and coccidal power of the blood in, **8,** 302.
antipneumococcal powers of the blood in, **10,** 48.
development of proteolytic ferments in the blood during, **10,** 383.
in white rats, Bacillus muris as the etiological agent of, and its pathogenicity for laboratory animals, **10,** 17.
influenzal, changes in, **10,** 259.
lobar, a bacteriological and cellular study of the lung exudate during life in, **8,** 500.
lobar, comparative virulence of the pneumococcus in the sputum of, at various stages of the disease, with special reference to crisis, **9,** 287.
mouth disinfection in the prophylaxis and treatment of pneumonia, **3,** 774.
observations on the opsonic index and the antipneumococcal power of the blood in, **3,** 731.
phagocytability of pneumococci, in the sputum in, **5,** 273.
serum studies in. The antigenic properties of the exudate, **13,** 69, 499.
some observations on opsonins in, and in four streptococcus infections, **4,** 601.

Pneumonic and scarlatinal sera, toxic action of, on paramecia, **1,** 211.
exudate, the antigenic properties of the constituents of, **13,** 499.
lungs and virulent pneumococci, action on dogs of the toxic substance obtainable from, **11,** 480.

Poison, protein, of the tonsil, **15,** 549.

Poliomyelitis, an attempt to transmit, by the bite of Lyperosia irritans, **15,** 1.

Pollution, methods of testing shellfish for, **7,** 78.
water, nitrite destruction as a presumptive test for the determination of, **13,** 136.

Polymorphic bacillus, anaerobic, probably Bacillus fusiformis, pyemia due to, **10,** 1.

Pools, swimming, sanitation of, **15,** 159.

Potato as a culture medium, a substitute for, **4,** 282.

Precancerous conditions, the effect of chemicals on the division rate of cells, with special reference to, **10,** 421.

Precipitin reaction in tuberculosis, **7,** 87.
reactions, immunological relationship of hordein of barley and gliadin of wheat as shown by the complement fixation, passive anaphylaxis, and by, **14,** 364.

Precipitins, bacterial, **1,** 463.
production of, **14,** 403.

Precision syringe for the accurate injection of small quantities: A holder for such syringes and for other purposes, **13,** 80.

Preliminary cultivation of bacteria, **S. 1,** 111.

Presumptive test, characteristics of colon bacilli and the value of, **S. 1,** 147.
test for the determination of water pollution, nitrite destruction as, **13,** 136.
tests, **S. 1,** 91.

Production, ammonia, relative constancy of, by certain bacteria, **13,** 425.
in monkeys of antibodies for human corpuscles, **13,** 375.
in vitro in the normal brain of structures simulating certain forms of Negri bodies, **11,** 459.
indol, by bacteria of the colon-typhoid group, **14,** 81.
of anaphylatoxic substances by autolysis of bacteria and their relations to endotoxins, **10,** 113.
of precipitins, **14,** 403.
of toxin, comparative, in diphtheria strains, **10,** 404.

Properties and agglutinations of some non-pathogenic vibrios, **12**, 472.
antigenic, of constituents of pneumonic exudate, **13**, 69, 499.
of desiccated rabies virus and its use in antirabic immunization, **10**, 369.
physical, of enzymes, **2**, 1.
Protective inoculation against Asiatic cholera, **2**, 107.
Protein, carcinomatous, in the blood in carcinoma, ferments for, **14**, 242.
content, influence of, on the absorption of antitoxin and agglutinin injected subcutaneously, **14**, 338.
poison of the tonsil, **15**, 549.
Proteins, and iodin compounds, the permeability of tubercles for, **11**, 349.
isolated, especially those of the hen's egg, experiments with, **9**, 147.
of the human placenta with special reference to the reproduction of a therapeutic serum for malignant chorion-epithelioma, the immunological reactions of, **14**, 385.
pure vegetable (Osborne-Mendel stunting food), the formation of antibodies in rats fed on, **15**, 279.
vegetable, biological reaction of. Anaphylaxis, **8**, 66; Is the specificity of the anaphylaxis reaction dependent on the chemical constitution of the proteins or on their biological relations, **12**, 341; Some immunity reactions of edestin, **13**, 103; The anaphylactogenic activity of some vegetable proteins, **14**, 377; The immunological relationship of hordein of barley and gliadin of wheat as shown by the complement fixation, passive anaphylaxis, and precipitin reactions, **14**, 364.
Proteolytic enzyme obtainable from pneumococci, on the toxicity of broth, of pneumococcus broth culture filtrates, and nature of, **11**, 286.
ferments in the blood during pneumonia, development of, **10**, 383.
substances in the blood, nature of, **9**, 282.
Pseudodiphtheria and the diphtheria bacillus, the relation of, **7**, 325.
bacilli as the cause of suppurative otitis, especially the post-scarlatinal, **4**, 326.
bacilli, so-called, the question of virulence among, **1**, 690.
bacilli, virulent, **3**, 128.
bacillus, immunological observations in ulcerative cystitis caused by, **6**, 296.
Pseudodiphtheric otitis, the opsonic index and vaccine therapy of, **4**, 313.
Public health, historical study of legislation regarding, in the states of New York and Massachusetts, **S. 4**, 1.
on the relation of illuminating gas to, **9**, 380.
Pulmonary infection with acid-fast actinomyces, **2**, 421.
tuberculosis, secondary infection in. The recovery of the streptococcus and pneumococcus from the blood in, **9**, 237.
Purpura associated with Bacillus mucosus in the blood, **15**, 151.
hemorrhagica with generalized infection with Bacillus para-typhosis, **4**, 175.
Putrescibility in sewage effluents, the relative applicability of current methods for, **S. 2**, 80.
of sewages, relation of nitrates to, **13**, 236.
of water, **1**, 77.
Pyemia due to an anaerobic polymorphic bacillus, probably Bacillus fusiformis, **10**, 1.
Pyocyaneus infections, **5**, 542.
Piroplasmosis hominis, **1**, 31.

Quantitative estimation of bacteria in water and sewage, media for, **1**, 358.
Quincy (Illinois) typhoid epidemic, **13**, 16.
Quinin, effect of, on rabies in dogs, **13**, 165.
treatment of rabies, **15**, 205.

Quinone and commoner disinfectants, bactericidal action of, as determined by the Rideal-Walker method, **9**, 181.
and other phenol oxidation products, the bactericidal action of, as determined by the Rideal-Walker method, **9**, 172.

Rabbit sera, agglutination power of, on cultures of the dysentery bacillus group, **2**, 87.
serum, natural hemolysins in, **13**, 96.

Rabbits, a bacillus from spontaneous abscesses in, and its relation to the influenza bacillus, **12**, 49.
experimental streptococcal arthritis in, **12**, 364.
inoculated with streptococci, the renal changes in, **15**, 369.

Rabies collecting outfit, **S. 3**, 119.
further studies on the effect of desiccation of the virus of and the use of this material in immunization, **13**, 155.
hydrophobia. A study of fixed virus, determination of the M.L.D., vaccine treatment, and immunity tests, **14**, 33.
in dogs, effect of quinin on, **13**, 165.
organisms of, and experiments in its artificial cultivation, **13**, 232.
quinin treatment of, **15**, 205.
two methods for obtaining a virus of, freed from the cells of the host and from contaminating organisms, and the application of these methods to other filterable viruses and glycerin-extracts, **12**, 202.
virus, desiccated, the properties of, and its use in antirabic immunization, **10**, 369.
virus of, freed from the cells of the host and from contaminating organisms, **13**, 203.
virus of, the effect of vacuum desiccation on, with remarks on a new method, **8**, 47.

Rat fleas, transmission of Trypanosoma lewisi, with short description of three new herpetomonads, **8**, 125.
leprosy, and on the fate of human and rat lepra bacilli in flies, **5**, 507.
leprosy, experiments on vaccination against, **6**, 630.
typhoid, effect of specific vaccines on, **9**, 229.
virus, experiments on the use of Bacillus pestis-caviae as, **5**, 519.

Rats fed on pure vegetable proteins (Osborne-Mendel stunting food), the formation of antibodies in, **15**, 279.
white, Bacillus muris as the etiological agent of pneumonitis in, and its pathogenicity for laboratory animals, **10**, 17.
white, spontaneous typhoid-like epidemic among, **14**, 180.
white, the anthracidal substance in the serum of, **3**, 110.

Reaction, agglutination, the value of, and of the bacteriological method in the diagnosis of glanders, **5**, 401.
anaphylaxis, is the specificity of, dependent on the chemical constitution of the proteins or on their biological relations? **12**, 341.
complement fixation, application of, to the diphtheria group of organisms, **11**, 433.
complement fixation, in the diagnosis of contagious abortion of cattle, **10**, 178.
conjunctival, for glanders (ophthalmic test), **12**, 170.
fermentative, of bacteria, especially the streptococci, variability of, **15**, 234.
of various bacteria on aesculin agar, **7**, 67.
precipitin, in tuberculosis, **7**, 87.
Wassermann, some observations on, **7**, 476.

Reactions, anaphylactic, interrelations in the streptococcus group with special reference to, **12**, 386.
biological, of vegetable proteins. Anaphylaxis, **8**, 66; Is the specificity of the anaphylaxis reaction dependent on the chemical constitution of the protein or on their biological relations? **12**, 341; Some immunity reactions of edestin, **13**, 103; The anaphylactogenic activity of some vegetable proteins, **14**, 377; The immunological relationship of hordein of barley and gliadin of wheat as shown by the complement fixation, passive, anaphylaxis, and precipitin reactions, **14**, 364.
cholera red and indol, a search into the nitrate and nitrite content of Witte's peptone with special reference to its influence on the demonstration of, **2**, 436.
complement fixation, a study of diphtheria bacilli with special reference to, **11**, 44.
complement fixation, a study of typhoid colon intermediate group of bacilli with special reference to, **13**, 321.
fermentation, classification of pathogenic streptococci by, **15**, 63.
fermentative, in carbohydrate media, the differentiation of fecal streptococci by, **13**, 442.
meiostagmin and epiphanin, in the diagnosis of carcinoma, **12**, 459.
some immunity, of edestin, **13**, 103.
"Regressive mordanting" in association with anilin stains, histologic differentiation by means of, with special reference to elastic tissue, **15**, 561.
Relapse in malarial infections, etiology of, **12**, 277.
Relapsing fever in man, study of a spirochete obtained from a case of, with notes on morphology, animal reactions, and attempts at cultivation, **3**, 266.
fever, two cases of; occurrence of this disease throughout the world at the present day, **3**, 233.
Renal, cardiac, and articular lesions, bacteriology and pathology of the tonsils with special reference to, **10**, 148.
changes in rabbits inoculated with streptococci, **15**, 389.
Report of the Committee on Standard Methods of Water Analysis to the Laboratory Section of the American Public Health Association, **S. 1**, 1.
Residue in water, **S. 1**, 43.
Resistance of embryonic epithelium, transplantable mouse cancer, and certain organisms to freezing with liquid air, **5**, 443.
of human erythrocytes to cobra venom, **6**, 688.
of tubercle bacilli to dry heat, **9**, 115.
Rheumatic myocarditis, experimental, **11**, 243.
Rheumatism, acute articular, and muscular, etiology of, **14**, 61.
acute articular experimental, streptococcus in relation to etiology of, **1**, 714.
acute articular, opsonic index in, **6**, 346.
Rhinitis, acute, an anaerobic organism associated with, **13**, 283.
chronic, a pleomorphic branching organism isolated from a case of, **15**, 352.
Rhinoscleroma, relation of the bacillus mucosus capsulatus group to, and of the various members of the group to one another, **4**, 51.
Rhus toxicodendron, antibodies to glucosides, with especial reference to, **4**, 541.
Rideal-Walker method, bactericidal action of quinone and other phenol oxidation products as determined by, **9**, 172.
test and Rideal-Walker method, some remarks on, with special reference to the "life factor" and to the "mechanics of disinfection" and their influence on velocity and equilibrium values, **10**, 248.
Rockford (Illinois) typhoid epidemic, **11**, 21.

Rocky Mountain spotted fever, **8**, 421.
complement deviation in, **8**, 330.
experimental therapy of, **10**, 294.
in the rabbit, **6**, 383.
immunity in, **5**, 221.
pathological anatomy of virus and means of transmission of, **4**, 141.
time relationships of the wood-tick in the transmission of, **8**, 339.
Rodents, plague-like disease of, note on the causative agent, Bacterium tularense, **10**, 61.
Roentgen irradiation, effects of; and proliferation of the epithelium produced by Sudan III, scharlach roth, and paraffin, **6**, 205.
"Rural disease," is typhoid fever a ? **11**, 141.

Salt solution, virulent, use of, as a virus in manufacturing hog-cholera serum, **12**, 335.
solutions and other substances, the antilytic action of, **1**, 379.
Salts and drugs, general principles of the pharmacodynamics of, **3**, 572.
certain, action of, on the complement in immune serum, **1**, 112.
effect of reaction and of, on normal opsonins, **6**, 662.
inorganic, as sources of nitrogen, metabolism of certain rapidly growing tubercle bacilli in media with, **15**, 433.
Sanitary and bacteriological conditions of the milk-supply of New York City, **11**, 1.
significance of body cells in milk, **14**, 93.
value or cleaning efficiency of vacuum cleaners, **9**, 265.
Sanitation of swimming pools, **15**, 159.
Scarlatina, agglutination of streptococci cultivated from cases of, by human sera, **1**, 91.
streptococco-opsonic index in, **4**, 304.
Scarlatinal and pneumonic sera, toxic action on paramecia, **1**, 211.
Scarlet fever, anaerobic cultures in, **15**, 85.
and pneumonia, on the variations in the phagocytic and coccidal power of the blood in, **8**, 302.
blood in, **2**, 375.
injections of heterologous streptococci killed by galactose in erysipelas and in, **5**, 608.
intraleukocytic bodies in, **11**, 468.
leukocytosis in, **1**, 404, **2**, 375.
some characteristics of the streptococci found in, **6**, 332.
specific antibodies in, **9**, 366.
Scharlach r. in olive oil, an attempt to produce an atypical epithelial growth by the injection of, **4**, 385.
Schenkii, sporothrix, morphology of, in tissues and in artificial media, **12**, 453.
Scurvy, influence of, on hemorrhages in plague, **6**, 564.
Secondary infection in pulmonary tuberculosis, **9**, 237.
Secretion, internal, of the mammae, as a factor in the onset of labor, **10**, 244.
Sensitization, serum, as related to dosage of antitoxin in man and in animals, **14**, 347.
Sepsis, diphtheria and tetanus, oral administration of antitoxins for preventing, **3**, 701.

Septic sore throat epidemic in Cortland and Homer, New York, **14,** 124.
sore throat or tonsillitis, an outbreak of, in eastern Massachusetts and its relation to an infected milk-supply, **10,** 73.
sore throat, relation of, to infected milk, **15,** 130.
sore throat, study of an outbreak of, in Concord (N. H.), January, 1912. **12,** 481.
Sera, antistreptococcic and antigonococcic, concentration of, **10,** 416.
antitoxic and immunizing, **S. 1,** 284.
cytotoxic immune, anaphylaxis, and protective enzymes, **14,** 351.
of cold-blooded animals, the effects on streptococci of, **1,** 107.
scarlatinal and pneumonic, the toxic action on paramecia, **1,** 211.
various immune, agglutination of typhoid and paratyphoid bacilli by, **1,** 445.
Serum, active human, the use of, in the serum diagnosis of syphilis, **8,** 427.
anaphylaxis, the influence of chloral hydrate on, **7,** 577.
and "paraffin" plasma, bactericidal and hemolytic powers of, **10,** 200.
and plasma, variation in the complement content of, **11,** 225.
antidiphtheric and antitoxin globulin solution, the influence of age and temperature on, **7,** 481.
antidiphtheric from horses, bleeding to death in order to obtain a maximum amount of, **6,** 616.
antigenic properties of fibrin (exudate), **13,** 69, 499.
antihog-cholera, standardization of, **15,** 257.
antistreptococcus, **9,** 130.
antistreptococcus in streptococcic infections in man, the action of, **10,** 321.
antitetanic, the treatment of tetanus by, **15,** 367.
blood, identification of alcohol-soluble hemolysins in, **2,** 97.
component, the third, **3,** 647; **5,** 55.
concentrated antistreptococcus, and vaccines, the action of, in experimental streptococcal arthritis, **15,** 215.
diagnosis of syphilis, the use of active human serum in, **8,** 427.
for Rocky Mountain spotted fever, preventive and curative action of, and the inefficiency of sodium cacodylate as a curative agent for this disease in guinea-pigs, **10,** 294.
heated, human, on the activation of, **5,** 245.
hemolysins in goats, **10,** 332.
hemolytic, on the so-called physical chemistry of, **4,** 219.
hemolytic, quantitative study of, **2,** 460.
hog-cholera, use of virulent salt solution in manufacturing, **12,** 335.
immune, the action of certain salts on the complement in, **1,** 112.
normal, on the interaction of thermolabile and thermostable opsonic substances in, **5,** 263.
normal, on the leukocytoxins of, **5,** 173.
normal, on the specificity of opsonins in, **6,** 249.
of white rats, the anthracidal substance in, **3,** 110.
pathology, a fundamental error in current attempts to apply physical chemistry to, **3,** 638.
rabbit, concerning natural hemolysin in, **13,** 96.
resistance and virulence, the relation between, **2,** 569.
sensitization as related to dosage of antitoxin in man and animals, **14,** 347.
studies in pneumonia. The antigenic properties of the exudate, **13,** 69, 499.
therapeutic, for malignant chorion-epithelioma, the immunological reaction of the protein of the human placenta with special reference to the production of, **14,** 385.
thyrotoxic, experimental study of, **1,** 127.
Sewage, Boston, investigations on the purification of, **8,** 259.
changes in the bacterial flora of, during storage, **1,** 170.
collection and preservation of samples of, for analysis, **S. 2,** 139.
current methods for the determination of organic matter in, **S. 2,** 97.

Sewage, determination of the organic nitrogen in, by the Kjeldahl process, S. 1, 255.
discharged into the Boston harbor from the south metropolitan district, the chemical and bacterial composition of, with special reference to seasonal variations, S. 1, 1, 75.
effluent or polluted river water, a new method of determining the relative stability of, 14, 482.
effluents, the relative applicability of current methods for the determination of putrescibility in, S. 2, 80.
effluents, the use of methylene blue in testing, S. 3, 1.
longevity of Bacillus typhosus in natural waters and in, S. 2, 40.
media for the quantitative estimation of bacteria in water and in, 1, 358.
methods in current use for the determination of free and albuminoid ammonia in, 1, 327.
number of bacteria in, and sewage effluents determined by plating on different media and by a new direct method of direct microscopic enumeration, S. 1, 209.
practical advantages of the Gooch crucible in the determination of the total and volatile suspended matter in, S. 2, 123.
purification, the mode of action of the contact filter in, S. 1, 229.
resistance to decomposition of certain organic matters in, S. 2, 136.
soft-water, the application to, of direct processes for the determination of Kjeldahl nitrogen and nitrogen as free ammonia, S. 3, 14.
streptococci, Houston's, and Bacillus coli, some cultural relations and antagonisms of, with a method for the detection and separation of these microorganisms in polluted waters, 1, 193.
Sewages, relation of nitrates to the putrescibility of, 13, 236.
Sheep-tick, life history of a flagellate in the alimentary tract of, 6, 98.
Shellfish, methods of testing for pollution, 7, 78.
Sinuses, accessory, a spirochete associated with infections of, 13, 280.
Small-pox in the United States, 1895-1912, variation in type of infectious disease as shown by the history of, 13, 171.
Sodium cacodylate, inefficiency of, as a curative agent for spotted fever in guinea-pigs, 10, 294.
iodosobenzoate and sodium iodoxybenzoate, the influence of, on phagocytosis, 11, 427.
sulphite: A dangerous food preservative, 1, 355.
Sore throat epidemic, a study of streptococci from milk and from, and the effect of milk on streptococci, 11, 338.
epidemic, septic, in Cortland and Homer, New York, 14, 124.
septic, occurring in Concord (N. H.) January, 1912, an outbreak of, 12, 481.
septic, or tonsillitis, an outbreak of, in eastern Massachusetts and its relation to an infected milk supply, 10, 73.
septic, the relation of, to infected milk, 15, 130.
Species of bacteria, S. 1, 93.
Specific nature of anaphylaxis, 4, 552.
vaccines on rat typhoid, the effect of, 9, 229.
Specificity of opsonins in normal serum, 5, 249.
of the anaphylaxis reaction, is it dependent on the chemical constitution of the proteins or on their biological relations? 12, 341.
Spirilla and fusiform bacilli, 8, 316.
and fusiform bacilli, the identity of, 3, 148.
and fusiform bacilli, the occurrence of, in connection with morbid processes, 2, 446.
Spirillum obermeieri and related organisms, 3, 291.

Spirochaeta microgyrata (Löwenthal), var. Gaylordi, a spirochete in mouse cancer, **4**, 171.
pallida, on the cultivation of, **12**, 55.
suis, its significance as a pathogenic organism, **13**, 463.
suis, some phenomena involved in the life history of, **14**, 246.
Spirochete associated with infections of the accessory sinuses, **13**, 280.
from a case of relapsing fever in man with notes on morphology, animal reaction, and attempts at cultivation, **3**, 266.
in primary and transplanted carcinoma of the breast of mice, **4**, 155.
Splenomegaly and Banti's disease, **5**, 23.
Sporothricosis in the United States, **11**, 193.
Sporothrix, interagglutination experiments with various strains of, **12**, 140.
schenkii in tissues and in artificial media, the morphology of, **12**, 453.
schenkii, the formation of chlamydospores in, **15**, 483.
"Spotted fever," or "tick fever" of the Rocky Mountains, **1**, 31.
Rocky Mountain, a contribution to the pathological anatomy of, **8**, 421.
Spotted fever, Rocky Mountain, complement deviation in, **8**, 330.
Rocky Mountain, experimental therapy of, **10**, 294.
Rocky Mountain, in the rabbit, **6**, 383.
Rocky Mountain, observation in the virus and means of transmission of, **4**, 141.
studies on immunity in, **5**, 221.
time relationships of the wood-tick in the transmission of, **8**, 339.
transmission of, by other than Montana and Idaho ticks, **8**, 322.
transmission of, by the tick in nature, **8**, 327.
Sputum, comparative tests of, by the Kinyoun and Elliman-Erlandsen methods, **14**, 159.
in pneumonia, phagocytability of pneumococci in, **5**, 273.
of lobar pneumonia, comparative virulence of the pneumococcus in, at various stages of the disease, with special reference to crisis, **9**, 287.
Squirrel, ground, susceptibility of, to plague infection, **9**, 276.
Squirrels, ground, tumors of, **14**, 53.
Stain, new, for bacterial capsules with special reference to pneumococci, **9**, 1.
Staining encapsulated pneumococci in smear and section, studies on simple and differential methods of, **3**, 610.
intra-vitam, of tuberculous guinea-pigs with fat-soluble dyes, **11**, 373. **12**, 274.
of bacteria, **S. 1**, 99.
of encapsulated bacteria, with particular reference to pneumococci and streptococci, **4**, 426.
of Negri bodies, a method for, **5**, 566.
the polar bodies of diphtheria bacilli, a new simple method for, **3**, 770.
vital, of tubercles, preliminary report of experiments in, **12**, 68.
Stains, anilin in association with "regressive mordanting," histologic differentiation by means of, with special reference to elastic tissue, **15**, 561.
bacterial, the disinfectant action of, **14**, 255.
Standardization, bacteriological, of disinfectants, **8**, 1.
of antihog-cholera serum, **15**, 257.
of disinfectants, the application of certain laws of physical chemistry in, **8**, 27.
Staphylococcus albus and gonococcus from the urethra in plate culture, observations on the growth of (a criticism of Warden's work), **15**, 309.
aureus, action of, on the Klebs-Loeffler bacillus, **10**, 24.
in gonorrhea, **13**, 124.

Statistical study of the streptococci from milk and from the human throat, **12**, 144.
Sterilization of blood for cultural purposes, a simple method of, **3**, 772.
of media, **1**, 105.
Stomach lesions in guinea-pigs caused by the diphtheria toxin and its bearing on experimental gastric ulcer, **4**, 1.
tuberculosis of, with extensive tuberculous lymphangitis, **12**, 236.
Streptococcal arthritis, experimental, in rabbits, **12**, 364.
arthritis, experimental, the action of vaccines and of concentrated anti-streptococcus serum in, **15**, 215.
Streptococci, a new color medium for the isolation and differentiation of, **7**, 73.
and leukocytes in milk, the relative importance of, **S. 3**, 50.
and leukocytes, in the production of a high-grade milk, **5**, 72.
and pneumococci, staining of encapsulated bacteria with particular reference to, **4**, 426.
and their products, liver necrosis and venous thrombosis in horses actively immunized with diphtheria and tetanus toxins and with, **3**, 619.
characteristics of, in scarlet fever, **6**, 332.
classification of, by their action on carbohydrates and related organic media, **10**, 285.
especially those cultivated from cases of scarlatina, agglutination of, by human sera, **1**, 91.
effect of meat and meat extract on the fermentative activity of, **13**, 404.
effects on, of sera of cold-blooded animals, **1**, 107.
fecal, the differentiation of, by their fermentative reactions in carbohydrate media, **13**, 442.
found in scarlet fever, some characteristics of, **6**, 332.
from milk and from epidemic sore throat and the effect of milk on streptococci, **11**, 338.
from milk and from the human throat, a statistical study of, **12**, 144.
from scarlatinal and normal throats and from other sources, **3**, 755.
from the milk epidemic in Chicago, 1911-12, **12**, 364.
hemologous, killed by galactose in the treatment of suppurative complications in contagious diseases, injections of, **7**, 99.
hemolytic, of human origin, experimental bovine mastitis produced with, **15**, 135.
heterologous, killed by galactose, the injections of, in erysipelas and in scarlet fever, **5**, 608.
homologous, killed by heat, effects of injections of, in streptococcus complications in contagious diseases, **5**, 585.
Houston's sewage, some cultural relations and antagonisms of Bacillus coli and, **1**, 193.
in milk, significance of, **3**, 173.
intestinal, from the horse, the cow, and man, **7**, 1.
killed, the effect of the injection of, on the streptococco-opsonic index of normal rabbits, **4**, 595.
method for making carbohydrate serum broth of constant composition for use in the study of, **15**, 209.
milk, a biometrical study of, **10**, 272.
occurring as diplococci in rats, **5**, 515.
of bovine and human origin in milk and milk products, the growth and viability of, **15**, 378.
pathogenic, classification of, by fermentative reactions, **15**, 63.
relative longevity of, and possible errors in the isolation and differentiation of, **15**, 293.
renal changes of rabbits inoculated with, **15**, 389.
variability of the fermentative reaction of bacteria, especially, **15**, 234.

Streptococco-opsonic index in scarlatina, **4**, 304.
-opsonic index of normal rabbits, the effect of the injection of killed streptococci on, **4**, 595.
Streptococcus and pneumococcus, the recovery of, from the blood in secondary infection in pulmonary tuberculosis, **9**, 237.
arthritis, experimental, in relation to the etiology of acute articular rheumatism, **1**, 714.
group, interrelations in, with special reference to anaphylactic reactions, **12**, 386.
immunization, **5**, 589.
infections, **3**, 156.
infections, four, opsonins in pneumonia and in, **4**, 601.
infections in man, action of antistreptococcus serum in, **10**, 321.
killed, the effect of the injection of, on the streptococcus opsonic index of normal rabbits, **4**, 595.
lacticus, non-inheritance of impressed variations in, **7**, 680.
lacticus, the pathogenicity of, **4**, 87.
-pneumococcus group, transmutations within, **14**, 1.
Streptolysin, nature of, **4**, 277.
Strychnin, caffein, chloral, antipyrin, cholesterol, and lactic acid, the influence of, on phagocytosis, **13**, 408.
Substances, anaphylatoxic, production of, by autolysis of bacteria and their relations to endotoxins, **10**, 113.
Summer diarrhea in infants, **2**, 70.
Suppuration in the tubercles of leprosy, of, **8**, 39.
Swimming pools, sanitation of, **15**, 159.
Synthetic media, simple, for the growth of Bacillus coli and for its isolation from water, **5**, 616.
Syphilis, congenital, the numerical relationship of Treponema pallidum to certain pathological types of, **6**, 17.
the use of active human serum in the serum diagnosis of, **8**, 427.
see lues.
Syringe, new precision, for the accurate injection of small quantities: A holder for such syringes and other purposes, **13**, 80.

Test, complement fixation (Gay's modification of the Besredka method) in the differentiation of acid-fast bacilli, **13**, 301.
complement fixation in the diagnosis of lues in the military service, further observations on, **9**, 213.
improved and rapid, for indol in broth cultures and for the presence of the substance in meat-sugar-free broth, **4**, 641.
presumptive, nitrite destruction as, for the determination of water pollution, **13**, 136.
Tests, carbohydrate fermentation, the use of decolorized acid fuchsin as an acid indicator in, with some remarks on acid product on, by bacteria, **15**, 227.
comparative, of sputum by the Kinyoun and Elliman-Erlandsen methods, **14**, 159.
for Bacillus coli communis, the interpretation of, **9**, 343.
Tetanus, diphtheria, and possibly sepsis, the oral administration of antitoxins for, **3**, 701.
intoxication, adjuvant action of serum, broth, and egg-albumin on, **3**, 116.
the treatment of, by antitetanic serum, **15**, 367.

Tetanus toxin, Bacillus tetani, and certain laboratory animals, the effect of gentian violet on, **15,** 566.
toxins, liver necrosis and venous thrombosis in horses actively immunized with streptococci and their products, and with diphtheria, **3,** 619.
treatment of, **13,** 309.

Texas fever, a contribution to the clinical knowledge of, **2,** 529.

Therapy, experimental, of Rocky Mountain spotted fever, **10,** 294.
vaccine, and the opsonic index of pseudodiphtheric otitis, **4,** 313.

Thermolabile and thermostable opsonic substances in normal serum, on the interaction of, **5,** 263.

Thermoregulator, **S. 1,** 310.
automatic, for 20 C. incubators, **1,** 419.

Thermostabile and simple bacterial and opsonic substances, **5,** 570.
hemolytic precipitate from nutrient broth, **2,** 511.

Throat, human, a statistical study of the streptococci from milk and from, **12,** 144.
septic sore, study of an outbreak in Concord (N. H.), January, 1912, **12,** 481.

Thrombosis, venous, and liver necrosis in horses, actively immunized with diphtheric and tetanus toxins and with streptococci and their products, **3,** 619.

Thyroids, dog's, on the physiological nature of the "glandular hyperplasis," with report of a case typical of the group, **4,** 417.

Thyrotoxic serum, **1,** 127.

"Tick fever," or "spotted fever" of the Rocky Mountains, **1,** 31.

Tick in nature, transmission of spotted fever by, **8,** 327.
-infested regions, blood in dairy cows in, **9,** 324.
wood, time relationships of, in the transmission of Rocky Mountain spotted fever, **8,** 339.

Ticks, other than Montana and Idaho, transmission of spotted fever by, **8,** 322.

Tonsil, protein poison of, **15,** 549.

Tonsils, actinomyces-like granules in, **14,** 144.
bacteriology and pathology of, with special reference to chronic articular, renal, and cardiac lesions, **10,** 148.
human, toxicity of, **13,** 273.
plasma cells in, **10,** 142.

Tonsillitis or septic sore throat, an outbreak of, in eastern Massachusetts and its relation to an infected milk supply, **10,** 73.

Toxic action of scarlatinal and pneumonic sera on paramecia, **1,** 211.
character of the colostrum in parturient paresis, **10,** 233.
effect of certain acids on typhoid and colon bacilli in relation to the degree of, their dissociation, **3,** 547.
substance from pneumococci, on the nature of, **11,** 235.
substance obtainable from pneumococci and pneumonic lungs, the action on dogs of, **11,** 480.
substances obtainable from pneumococci, **11,** 94.

Toxicity of broth, of pneumococcus broth culture filtrates, and on the nature of the proteolytic enzyme obtainable from pneumococci, **11,** 286.
of human tonsils, **13,** 273.

Toxin, diphtheria, administration of, in a collodion sac, **8,** 50.
diphtheria, natural immunity and susceptibility to, **4,** 509.
production, comparative, in diphtheria strains, **10,** 404.

Toxins and antitoxins of poisonous mushrooms, (Amanita phalloides), **3,** 191.
of intestinal obstruction, **15,** 124.

Trachoma and allied conditions in the public school children of New York City, **14**, 261.

Transmission of typhus fever, **9**, 9.
of immunity from mother to offspring, **10**, 332.

Transmutations within the streptococcus-pneumococcus group, **14**, 1.

Treatment, quinin, of rabies, **13**, 165, **15**, 187.

Treponena pallidum (Spirochaeta pallida), on the cultivation of, **12**, 55.
pallidum, the numerical relationship of, to certain pathological types of congenital syphilis, **6**, 17.

Trypanosoma brucei, an attenuated culture of, **15**, 24.
brucei, on the cultivation of, **1**, 1.
lewisi and Trypanosoma brucei, the life history of, **1**, 517.
lewisi, immunization by means of cultures of, **11**, 411.
lewisi, transmission of, by rat fleas, with short descriptions of three new herpetomonads, **8**, 125.

Trypanosome, a new species of, occurring in the mouse, mus musculus, **3**, 228.

Trypanosomes of birds, **2**, 256.
of mosquitoes and other insects, **4**, 223.
of tsetse flies, **3**, 394.

Tubercle bacilli and other acid-fast bacteria, the occurrence of a soluble lipase in broth cultures of, **15**, 443.
bacilli, certain rapidly growing human, a comparison of the curves of lipolytic activity and proteolysis of, in media of varied composition, **15**, 460.
bacilli, certain rapidly growing human, in a modified Uschinsky medium, metabolism of, **15**, 428.
bacilli, certain rapidly growing human, in broth free from lipoids and fatty substances, metabolism of, **15**, 423.
bacilli, certain rapidly growing, the relative activity of the soluble lipase and lipase liberated during autolysis of, **15**, 451.
bacilli, certain rapidly growing, in media with inorganic salts as sources of nitrogen, **15**, 433.
bacilli, cultures of, isolated from milk, **6**, 329.
bacilli, fat-free, and granulation tissue, an experimental study of the influence of iodin and iodids on the absorption of, **15**, 487.
bacilli in milk, **6**, 325.
bacilli in the blood, **14**, 162.
bacilli in the market milk of the city of Washington, D. C., frequency of, **5**, 107.
bacilli, rapidly growing, observations on the specificity and thermostability of the lipase developed during the growth of, in media of varied composition, **15**, 455.
bacilli, saprophytic human, in plain, dextrose, mannite, and glycerin broths, metabolism of, **15**, 417.
bacilli, the behavior of, toward fat-dyes, **12**, 249.
bacilli, the influence of the ingestion of, on infection, **6**, 387.
bacilli, the resistance of, to dry heat, **9**, 115.

Tubercles of leprosy, on the presence of suppuration in, **8**, 39.
the permeability of, for iodin compounds and proteins, **11**, 349.

Tuberculocidal action of certain chemical disinfectants, **15**, 245.

Tuberculosis, avian, **13**, 1.
bacillus, some chemical conditions influencing acid-proofness and non-acid-proofness in a saprophytic culture of, **13**, 144.
bacillus, the action of sunlight on bacteria, with special reference to, **S. 3**, 126.

Tuberculosis, experimental, the influence of fresh and autolyzed organ extracts on, **8,** 176.
frequency, localization, and modes of dissemination of, with special reference to its occurrence in the lymph-nodes and during childhood, **2,** 143.
of the placenta, **4,** 347.
of the stomach with extensive tuberculous lymphangitis, **12,** 236.
placental and congenital, a contribution to the casuistry of, **1,** 140.
precipitin reaction in, **7,** 87.
pulmonary, secondary infection in. The recovery of the streptococcus and pneumococcus from the blood, **9,** 237.
studies on the biochemistry and chemotherapy of: Influence of iodin and iodids on the absorption of granulation tissue and fat-free tubercle bacilli, **15,** 487; Intra-vitam staining of tuberculous guinea-pigs with fat-soluble dyes, **11,** 373, **12,** 274; Methylene blue and allied dyes in the treatment of tuberculosis, **13,** 378; The behavior of the tubercle bacillus toward fat-dyes, **12,** 249; The lipase of Bacillus tuberculosis and other bacteria, **11,** 388; The permeability of tubercles for iodins, compounds and proteins, **11,** 349; The therapeutic value of copper and its distribution in the tuberculous organism, **15,** 518; The vital staining of tubercles, **12,** 68; Therapeutic use of certain azo-dyes in experimentally produced tuberculosis in guinea-pigs, **14,** 498; Tuberculocidal action of certain chemical disinfectants, **15,** 245.

Tuberculous lymphangitis, extensive, tuberculosis of the stomach with, **12,** 236.

Tumors of ground squirrels, **14,** 53.

Turbidity standard, **S. 1,** 16.
standard, silica, a ready method for preparing, **S. 2,** 149.

Turbidmetric methods, **S. 1,** 19.

Typhoid and colon bacilli, the toxic effect of certain acids on, in relation to the degree of their dissociation, **3,** 547.
and paratyphoid bacilli, agglutination of, by various immune sera, **1,** 445.
bacilli in water, the persistence of agglutinability in, **S. 1,** 172.
bacillus, an attempt to modify the agglutinability of, by selective isolation of individual bacilli, **8,** 463.
bacillus, esterase activity of plain and dextrose broth cultures of, **15,** 354.
bacillus, experimental study of joint affections induced by, **6,** 181.
bacillus, longevity in water, **1,** 641.
bacillus, relation between oxygen in water and the longevity of, **S. 2,** 76.
bacillus, rôle of, in pulmonary complications of typhoid fever, **2,** 498.
carriers, value of opsonin determinations in the discovery of, **7,** 393.
colon-, group, observations on indol production by bacteria of, **14,** 81.
colon-, intermediate group of bacilli, with special reference to complement fixation reactions, **13,** 321.
epidemic, Quincy (Illinois), **13,** 16.
epidemic, Rockford (Illinois), **11,** 21.
fever, an outbreak of, in Cedar Falls, Iowa, **10,** 388.
fever, epidemic of 1908, Mankato, **9,** 410.
fever epidemics of 1911 and 1912, two Lincoln (Nebraska), **12,** 15.
fever, epidemiologic diagnosis and management of, **12,** 415.
fever, improved technic of agglutination test in, **1,** 236.
fever, is it a rural disease? **11,** 141.
fever, rôle of the typhoid bacillus in pulmonary complications of, **2,** 498.
-like bacilli in the water-supply of Frederickton, N. B., **S. 1,** 165.
-like epidemic, spontaneous, among white rats, observations on, **14,** 180.
observations on antibody formation in, **14,** 56.
opsonins, **5,** 1.
rat, effect of specific vaccines on, **9,** 229.

Typhus fever, natural and induced immunity to, **11,** 402.
fever, the problem of transmission in, **9,** 1.

Ulcer, gastric, experimental, a stomach lesion in guinea-pigs caused by diphtheria toxin and its bearing on, **4**, 1.

Ultra-violet light, experiments on disinfection of water with, with a discussion of the laws of disinfection, **10**, 305.

United States, sporothrichosis in, **11**, 193.
1893-1912, variation in type of infectious disease as shown by the history of small-pox in, **13**, 171.

Urethra, observations on the growth of the gonococcus and the staphylococcus albus in plate culture from, **15**, 309.

Urethritis, general gonococcus infection in a male child without evidence of, **12**, 52.

Urinary infections, a hemophilic bacillus found in, **7**, 599.
with colon bacilli, immune bodies in, and treatment by inoculation, **6**, 224.

Urine, bile, blood, and feces, an outfit for sending specimens of, and some results of the examination of such material, **7**, 457.

Uschinsky medium, modified, the metabolism of certain rapidly growing human tubercle bacilli in, **15**, 428.

Uterine discharges, a motile curved anaerobic bacillus in, **2**, 165.

Vaccine therapy and the opsonic index in pseudodiphtheric otitis, **4**, 313.
treatment, fixed virus, determination of the M.L.D., and immunity tests, a study of, **14**, 33.

Vaccines and concentrated antistreptococcus serum, the action of, in experimental streptococcal arthritis, **15**, 215.
specific, the effect of, on rat typhoid, **9**, 229.

Vaccination against rat leprosy, **6**, 630.

Vaccinia, cultivation of the virus of, **13**, 294, **14**, 87.

Vacuum cleaners, the cleaning efficiency or sanitary value of, **9**, 265.
desiccation, the effect of, on the virus of rabies, with remarks on a new method, **8**, 47.

Vaginitis. See vulvovaginitis.

Variability in the diphtheria group of bacilli, **5**, 421.
of the fermentative reaction of bacteria, especially the streptococci, **15**, 234.

Variations, fluctuating, among bacteria, a case of non-inheritance of, **6**, 90.
in the complement content of serum and plasma, **11**, 225.

Venom, cobra, on the resistance of human erythrocytes to, **6**, 688.
hemolysis, **7**, 181.

Venom hemolysis, **7**, 181.

"Venom Hemolysis," some remarks on the publication of Preston Kyes entitled, **10**, 57.

Venous thrombosis and liver necrosis in horses actively immunized with diphtheria and tetanus toxins and with streptococci and their products, **3**, 619.

Vertebrates, some structural transformations of the blood-cells of, **15**, 319.

Vibrio, anaerobic, isolated from a case of acute bronchitis, **15**, 350.
non-cholera, resembling the true cholera vibrio and a pigment-forming vibrio, **14**, 251.

Vibrios, non-pathogenic, properties and agglutinations of, **12**, 472.

Virulence among the so-called pseudodiphtheria bacilli, **1**, 690.
and serum resistance, the relation between, **2**, 569.
maintenance of, by Bacillus abortus, Bang, **2**, 359.
of diphtheria bacilli, guinea-pig test of, **8**, 295.
of diphtheria organisms in the throats of well school children and diphtheria convalescents, **4**, 36.
of old and recent cultures of Bacillus pestis, **6**, 170.
Virus, desiccated, rabies, the properties of, and of use in antirabic immunization, **10**, 369.
fixed, determination of the M.L.D., vaccine treatment, and immunity tests, **14**, 33.
hog-cholera, **12**, 39, 106, 206.
in manufacturing hog-cholera serum, use of virulent solution as a, **12**, 335.
of vaccinia, cultivation of, **13**, 294, **14**, 87.
production of antirabic immunity by intraspinal injections of, **11**, 397.
rabies, effect of vacuum desiccation on, with remarks on a new method, **8**, 47.
rabies, effects of desiccation of, and the use of this material in immunization, **13**, 155.
rabies, freed from the cells of the host and from contaminating organisms, **13**, 203.
rabies, freed from the cells of the host and from contaminating organisms, two methods for obtaining, and the application of these methods to other filterable viruses or glycerin-extracts, **12**, 202.
Vulvovaginitis, bacteriology of, **15**, 283.
epidemic gonorrheal, in young girls, **1**, 313, **5**, 133.
gonorrheal in children, inoculation treatment of, **5**, 158.

Warden's work, a criticism of, **15**, 309.
Washington, D. C., the frequency of tubercle bacilli in the market milk of the city of, **5**, 107.
Wassermann reaction, **7**, 476.
see complement.
Water, alkalinity of, **S. 1**, 61.
Analysis, Report of Committee on Standard Methods of, to the Laboratory Section of the American Public Health Association, **S. 1**, 1.
analysis, use of lactose-bile medium in, **S. 3**, 30.
and milk, infected, differential methods for detecting, **6**, 194.
and sewage, media for the quantitative estimation of bacteria in, **1**, 358.
Bacillus coli in, determination of, **4**, 397.
bacteria, sanitary chemical examination of, **S. 3**, 41.
bacteriological analysis of, **S. 1**, 81.
chemical analysis of, **S. 1**, 25.
collection of samples of, **S. 1**, 13.
comparative results obtained by the use of lactose-bile and dextrose-broth media for the detection of, **S. 3**, 39.
concerning tests for Bacillus coli communis in, **S. 1**, 142.
determination of copper in, **S. 2**, 205.
drinking, a simple test for the routine detection of the colon bacillus in, **1**, 341.
effluent or polluted river, and sewage, a new method for determining the relative stability of, **14**, 482.
experience with lactose-bile medium for the detection of Bacillus coli in, **S. 3**, 33.
experiments on disinfection with ultra-violet light, with a discussion of the laws of disinfection, **10**, 305.
filtration, the use of copper sulphate in, **S. 2**, 172.

Water, lime, solubility of calcium carbonate and of magnesium hydroxid and the precipitin of these salts with, **S. 2,** 151.
liver broth, a medium for the determination of gas-forming bacteria in, **8,** 289.
longevity of the typhoid bacilli in, **1,** 641.
persistence of agglutinability in typhoid bacilli in, **S. 1,** 172.
physical examination of, **S. 1,** 15.
pollution, nitrite destruction as a presumptive test for the determination of, **13,** 136.
-softening problem, the chemical phases of, **S. 1,** 157.
species of bacteria in, **S. 1,** 93.
-supplies, public, on the Mills-Reincke phenomenon and Hazen's theorem concerning the decrease in mortality from diseases other than typhoid fever following the purification of, **7,** 489.
supply of Frederickton, N. B., typhoid-like bacilli in, **S. 1,** 165.

Whooping-cough, the bacteriology of, **3,** 1.

Widal reactions, **S. 1,** 315.
See agglutination.

Witte's peptone, the nitrate and nitrite contents of, with special reference to its influence on the demonstration of the indol and cholera red reactions, **2,** 436.
